Farm Young People's Week Successful

Some 160 girls and boys have been in attendance at the recent farm young people's week at the University of Alberta. Interesting lectures and demonstrations

dealing with the various phases of farming and home-making were provided by members of the University staff and a number of enjoyable features of an entertaining nature rounded out what has come to be considered an important annual event in the life of the rural young people of the province.

LOCAL ITEMS

The Ladies' Card Club met at the home of Mrs. Chapman. Mrs. Lee held the highest score, winning a very nice aluminum tubed cake pan. The club will meet next week at the home of Mrs. Vanhook.

Sam Wong, proprietor of the King Restaurant who has spent the past eight months in China with his family there, returned to Chinook on Saturday.

H. A. Mickle, of Seattle, Wash., visited his brother, O. L. Mielke, this week.

W. Wright of Moose Jaw, superintendent of the Imperial Lumber Yards, transacted business at Chinook on Tuesday.

E. J. Anderson, B.Sc., Eyesight Specialist, will be in Chinook at the Hotel on Friday, June 14th.

The Big Spring Prairie Rock Club met at the home of Mrs. Geo. Hutchinson on Tuesday, June 4th, and enjoyed a very pleasant time. All the ladies of the club were present. The next meeting will be held at Mrs. Ole Rudy's on June 20th.

Alex. R. McTavish, R.O., Sight Specialist, of Drumheller, will make his regular monthly visit to the Hotel, Chinook, on Tuesday, June 18th. Dependable service; complete equipment. Eyes tested; glasses fitted; repairs. Prices very reasonable.

Last week the road gang from Hanna passed through here on through here with the outfit on their way west and have left the road to the east in shape. While here they done some grading for the town. During the past week Cooley Bros have also improved the streets facing their garage.

THIS WEEK Friday & Sat'day Chinook Theatre Clara Bow

GOOD CROWD ATTEND SPORTS

Oyen Takes First Ball Money—Large Number Attend Dance

A good crowd attended the sports put on by the Chinook Baseball Club yesterday afternoon in spite of the wind and threatening attitude of the weather.

Four teams entered the baseball tournament—Alsask, Youngstown, Oyen and Chinook. The draw resulted in Oyen and Chinook being thrown against one another and first to take the field.

Oyen were first to bat and from the start took advantage of everything that was going, scoring three runs in the first innings. Chinook can up and endeavored to even up the score, but it certainly was not Chinook's winning day. However, Trogen with a nice two base hit did not leave the innings scoreless for the home team. Bassett for Chinook had to retire with a split finger. The game until the sixth innings left no excitement until L. Stull (Oyen) hit a home run. Up to this period Chinook had only one run to their credit managed to find Stull, and with hard hitting earned them another four. The seventh and final innings Chinook blanked Oyen but tallied one, finishing the game 12-6 in favor of Oyen.

For Oyen, L. Stull, pitcher, and Fowler, pitcher, played good ball. Much credit is due Johnson (Chinook) for his work his work in the pitcher's box. Johnson delivers a ball which is hard to control, but McKinley proved equal to the occasion. The high wind at times made field work difficult, but some good work was done.

TEAMS

Chinook—Nelson, McKinley, Johnson, Steckle, McInnis, Butts, Bassett, Peterson, Barbey, Vanhook.

Oyen—Horne, Phillips, Chapin, Pears, L. Stull, Jordan C. Stull, Johanson, Fowler, Scott, Gosselin.

ALSASK-YOUNGSTOWN

From the start of the Alsask-Youngstown it was evident that Youngstown was out to win and started with three runs to their credit in the first. Alsask, however, came back with two, making it 3-2 in Youngstown's favor.

Much heavy batting was registered throughout the remainder of the game, but with good out-fielding by both teams, scoring was held to the minimum of 5 2 for Youngstown. Orton and Scott of Youngstown both made home runs.

TEAMS

Alsask—Jarrett, Jones, Conn, Brennan, Maitland, Walker, F. Jones, Cassidy, Nance, Cook. Battery, Brennan and Walker.

Youngstown—White, Hughes, Scott, Orton, Snider, Barons, Todderick, Jones, Nicholls. Battery, Nicholls and Scott.

OYEN-YOUNGSTOWN

In the final game Oyen blanked Youngstown for the first two innings, while taking a credit of four to themselves. In the third period Youngstown scored three and were held scoreless for the balance of the nine innings, while Oyen tallied seven. This was the best game of the day, and the score of 11-4 in Oyen's is due to their team work as a whole.

Nicholls of Youngstown pitched 14 of the 16 innings played.

Many of the baseball fans are looking for these teams to meet

Chinook

in the near future and will no doubt be a good drawing card.

During the day an aeroplane in the neighbourhood of Lensgraf's grove afforded amusement for many pleasure seekers during the day.

The dance at night was well attended, and from reports to hand everyone enjoyed themselves

Laughlin Sports

Laughlin sports were held on Wednesday, June 5th, at the grove one mile west of the school. The day was splendid, which doubtless helped to account for the goodly crowd who gathered there in the afternoon. The various committees are to be congratulated on the way everything went off so smoothly and efficiently. The following is the programme of sports which were enthusiastically entered into:

Horseshoe contest—Melville White and Homer Butts.

Boys' race under 6—1, Harry Kerry; 2, John Bergson.

Boys' race under 9—1, Chester Rideout; 2, George Kerry.

Boys' race under 12—1, Peter Weins; 2, Lorne Rideout.

Boys' race under 15—1, Willie Thompson; 2, Vincent Rideout.

Single ladies' race—1, Audrey Neff; 2, Margaret Bayley.

Married ladies' race—1, Mrs. Dressel; 2, Mrs. Marr.

Men's race—1, Oscar Nelson; 2, Clarence Peterson.

High jump—Jack Gingles and Clarence Peterson, tie.

Hop, step and jump—1, Oscar Nelson; 2, Jack Gingles.

Ladies' nail driving contest—1, Mrs. Kerry; 2, Mrs. Peterson.

Pillow fight—1, Leonard Bayley; 2, C. Peterson.

The results of the girls' races were not kept.

A dance in the evening at the school was well patronized with excellent music.

Examinations for high school commence Monday, June 17th.

Constable Shaw of Youngstown found a ladies' purse at Chinook on sports. Owner can have same by paying for ad. at Chinook Advance office.

James' Gilbert was taken to Youngstown and convicted for creating a disturbance at Chinook when he was fined \$26, which includes fine and costs.

At a meeting of the Chinook school held Thursday last, the teaching staff was re-engaged for next year, Mrs. Steckle getting an increase of \$50 a year, Messrs. Steckle and Nordon also an increase of \$50, and the salary of the principal was increased \$200, making his present salary \$2,100.

Mr. and Mrs. R. Steward and Mr. and Mrs. C. E. Neff motored to Hanna on Sunday.

Quite a number of town citizens motored to the river on Sunday.

Lyle Milligan, Kenneth Dawson and Raymond Vennard attended the stampede at Bindloss on Friday of last week.

Mr. and Mrs. W. S. Butts of Calgary motored to Chinook on Wednesday and the guests of Mrs. Butts' parents, Mr. and Mrs. J. Massey.

A baseball game between Ceres and Chinook played at the weekend resulted in the defeat of the local aggregation. The score 20 to 17 would indicate a loose game, but it was far from it, and with a little practice and coaching the Chinook juniors will likely be taking the laurels from the seniors.

The latest reports to hand of the Saskatchewan provincial election held last Thursday are 26 Liberals, 25 Conservatives, six Independents, four Progressives. At a meeting of the Conservatives, Progressives and Independents held in Regina this week, Dr. J. T. M. Anderson was unanimously chosen leader of the coalition party, who will no doubt force Premier Gardner and his cabinet to resign in the near future.

Science To Rescue Agriculture

Recent developments in the realm of agriculture indicate that science is hastening to the aid of the farmer in Western Canada and that the time is not far distant when only those farmers who make an earnest study of their problems and apply to those problems the discoveries which are being made by technical experts can hope to forge ahead and secure for themselves and their families the comforts which fall to the successful business-man.

There are several major problems confronting the man upon the land in the West at the present time. Among these are the questions of reducing the cost of the production of cash crops, and the necessity of not only fighting, but of forestalling reduction in yields through the agency of weeds, insect pests and diseases.

High costs of production and reduced yields through weeds, insects and diseases form a combination which can only be beaten by the alert farmer. Only the farmer who calls to his aid the forces of science can hope to overcome this profit-robbing alliance.

Consider, for instance, the cost of producing a bushel of wheat. While accurate figures are difficult to secure it is definitely known that some farmers are able to produce a bushel of wheat in their granary or in the elevator at a mere fraction of the figure which it has cost some of their neighbors to raise and harvest a similar bushel of wheat. It is a safe prediction that the cheap-production farmer has carefully studied the economic effects of the use of good seed, scientifically sound cultivation methods and the cheapest and best modes of garnering his crop. Not only has he done this, but he has kept some record of the cost of his various operations, thus enabling him to find out the weak spots and remedy them.

In this field of agricultural effort a great deal of pioneering work has been done by the farm implement companies, individual farmers of an inventive turn of mind, and leaders of agricultural engineering. It only remains for the average farmer to avail himself of the scientific work already done in this direction and apply and perhaps modify it to his own conditions and circumstances. Many are already doing so to their profit.

Then there is the problem of reducing the loss to profits through the prevalence of weeds which are annually taking a huge toll from farmers. Here, again, a good deal of research work has been carried on by experts in the employ of the Colleges of Agriculture, the Provincial Governments, and the Federal Department of Agriculture. It has been demonstrated beyond all doubt that methods can be adopted which will keep these pests within control in some case, and in others that they can be entirely eradicated.

As an illustration of what is being done, investigations conducted by the Saskatchewan Department of Agriculture last year, as to the possibilities of eradicating some of the most serious weeds by the use of chemicals might be cited. It is true that the tests showed that the cost of chemicals as a weed destruction agency on a large scale, may be uneconomical, but the value of such chemicals in eradicating small patches and preventing them from inundating the farm was clearly proved. A combination of chemicals, suitable cultivation methods, the use of clean and pure seed, will go a long way towards reducing the losses occasioned by weeds in this province.

Similar research work has been, and is being, carried on in the fight against diseases attacking wheat and other cereal grain crops. It is only necessary to refer to one of them—the efforts which are being made to breed a wheat that is not only resistant to the ravages of rust but that also contains those milling and baking attributes which make Canadian hard red spring wheat so desirable in the export market. Recent reports indicate that success in this field of endeavor is crowning the efforts of technical workers, and it is probably only a matter of two or three years before the farmers will be able to seed their fields with a rust-resistant wheat of good milling and baking quality.

The foregoing are only one or two illustrations of the manner in which science is being enlisted to aid the farmer and to be successful in this day and generation, it is essential that the agriculturist inform himself of what is being done on his behalf and apply the results of the work of those trained men to his own particular problems.

Imperial Airways Plan Luxurious Liners

Change In Construction Places Body Beneath Both Wings

Progress of commercial flying is shown in the order placed by Imperial Airways for a fleet of luxurious air liners, giant craft. Accommodation specified is for forty passengers in two saloons eight feet high within the enormous fuselage. The seats will be arranged four abreast, with a gangway running up the middle, and a private cabin, similar to those on Pullman cars, will be arranged for parties of two or four. In addition there will be a bar where refreshments can be served en route. Four engines, two on each wing, on either side of the fuselage, will drive the mammoth ship through the air, and three engines can, if necessary, alone be used. Safety slots will be fitted. One of the big changes in construction is that the body of the craft is slung beneath both wings, instead of between them. This helps to prevent noise in the cabin and also gives the passengers a clear view.

All-Canadian Highway

Will Go Through Most Spectacular Scenery In World

Before the year is over it may be possible for one to drive from Winnipeg to Vancouver on all weather highways without detours to the United States pavements. Gravelled roads already exist from Calgary to Golden, B.C., and the British Columbia and federal governments are now building around the "big bend" of the Columbia river to join the existing road down the Fraser Canyon to Vancouver. This highway when complete from Winnipeg to Pacific tide water will go through some of the most interesting country and the most spectacular scenery in the world.

It then remains to bridge or tunnel Lake Superior.

Authorize Court Action

Persons charged under the Criminal Code in Yukon territory with an indictable offence may, at the discretion of the minister of justice, be tried before a court in northwest territories. This authorization was given in a bill passed by the House.

Use Minard's for the rub down.

Bonsuing Immigrants

Feeling Seems To Be Veering Away From Coaxing People To Come To Canada

Three members of parliament, a Liberal, a Conservative, and a United Farmer, spoke the other day against continuing a heavy expenditure to induce immigrants to Canada. They represent farming districts in Alberta, Ontario and Quebec. There is reason to think that the view they express is gaining ground among farmers, and, perhaps less rapidly, among townsmen. The advisability of "coaxing" people to come to Canada is the point at issue.

There is room in Canada for more people, of course. There are people to spare in other countries, particularly in Great Britain. Sending agents abroad to invite people to come to Canada brings a response; there is no doubt about that. But perhaps more would come if we stopped inviting them. There never were so many people wanting to get into the United States as since "quack" laws were passed. The passage arouses curiosity as to what lies beyond it.—Edmonton Bulletin.

FEELING WORN OUT

When the Blood Becomes Watery a Breakdown Follows

How many girls and women suffer from headaches, pain in the back or side, poor appetite, nervousness and a constant feeling of weakness and palpitation of the heart at the least exertion. Of course, all these symptoms may not be present in any one case, but any of them show that the blood has become thin and watery, and good health can only be regained by enriching the blood. This should be done without delay. For this purpose nothing else acts so promptly and so surely as Dr. Williams' Pink Pills. Every dose helps to enrich the blood and tone weak nerves and thus brings new health and vitality to weak, and often despondent people. The truth of these statements is proved by the case of Mrs. Howard King, R.R. 5, Turin, N.S., who says: "A couple of years ago I grew so weak I could scarcely walk across a room without help. My blood was thin and I was almost breathless. I had taken Dr. Williams' Pink Pills on a former occasion with good results, and so decided to try them again. By the time I had taken a few boxes I felt much better, but I continued taking the pills for several months, by which time I could walk for miles with little effort. I do all my own housework and care for four children, and you will see what Dr. Williams' Pink Pills have done for me."

You can get these pills through any medicine dealer or by mail, post paid, at 50c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Russia Has Aero-Sleighs

Fitted With Airplane Propellers They Attain High Speed

Aero-sleighs, driven at 35 to 45 miles an hour by airplane propellers, recently travelled 2,100 miles from Moscow to Perm and back. Four sleighs took part in the complete run and five more accompanied them on the first day's journey.

The machines have a body of automobile design and look, except for the propeller, like an ordinary car mounted on runners. Under good conditions a speed of around 50 miles an hour can be attained.

Miller's Worm Powders are complete in themselves. They not only drive worms from the system, but repair the damage that worms cause, and so invigorate the constitution, that it speedily recovers from the disorders of the digestion that are the result of the work of these parasite intruders. They do their work thoroughly and strength and soundness follow their use.

Developing Vancouver Port

Further developments and improvements at the port of Vancouver, B.C., involving an expenditure of more than \$10,000,000 and bringing the port grain capacity to more than 21,000,000 bushels of storage are to be undertaken this year.

Will Go In For Sheep

A number of farmers around Carman, Man., are interested in the proposal to bring in breeding ewes for distribution among them on terms of payment spread over three years, and a number of applications will be sent in from this district.

BILIOUSNESS RELIEVED QUICKLY

This Purge Vegetable Pill quickly relieves the bloating, gently moves the bowels, and the acids pass away, the sour and acid stomach sweaters, and biliousness vanishes. Sick Headache, Indigestion, Bad Breath and Constipation improve by the gentle action of these tiny vegetable laxative pills. All Druggists 25c and 75c red packages. CARTER'S LIVER PILLS

Canadian Stock For United States

American Breeders Continue To Look To Canada For Foundation Stock

Some of the world's finest dairy stock, Canadian owned, went to American buyers at the sale held recently of the famous Innis herd of purebred Holsteins at Woodstock, Ontario, declared P. W. Walsh, superintendent of agriculture of the Canadian National Railways, who returned to Montreal after the sale, describing the sale as undoubtedly the most outstanding herd disposal sale of purebred dairy stock ever held in Canada.

Internationally famous stock, males and females which hold continental show ring records, were sold at the sale, which was held for the purpose of disposing of 70 head of the herd of J. W. Innis & Sons, well-known breeders at Woodstock, Ont. American buyers were very prominent at the sale, and took away some of the best animals, which is only another indication, states Mr. Walsh, that American breeders continue to look to Canada for their seed stock.

The famous all-American bull, Abbeville Sylvius Lad, which headed the Innis herd, fortunately, however, went to a Canadian breeder, M. L. McCarty, of Guelph, N.B., for \$3,000, and Mr. McCarty also secured a fine cow, in line with his present policy of building up one of the finest show herds on the Continent.

The full sister of the champion bull, Aggie Sylvia Third, went to the Detroit Creameries for \$3,000. These two animals comprised the all-American progeny of Dan last year.

The average price per head for the 69 head sold at the sale, stated Mr. Walsh, was \$355. A number of the animals were for round \$1,000 a piece. A year-old bull went to an American buyer for \$2,000 and the all-American cow of the herd, was taken up by a Canadian buyer for the same price.

Minard's Liniment for sick animals.

Straw Board Is New Product

Good Substitute For Lumber In Construction Of Buildings

Paper made from corn stalks has been proven successful in the middle Western States. New Western Canada has found a new and profitable use for straw. A company has been incorporated in Regina for the manufacture of straw-board to replace ordinary lumber in the construction of buildings and one machine has recently been placed in operation on the farm of T. A. McCusker, one mile north of Regina. Patent rights for Canada have been acquired. The machine, it is stated, compresses the straw under a pressure of 100 pounds to the square inch, the product being laced with wire and turned out in boards 12 feet long by five feet wide and two inches thick. The machine turns out 4,000 square feet of straw board per day. It is contended that the product is fireproof on account of the pressure to which it is subjected and that it possesses insulating qualities to a high degree.

For Farming Ranch

A Mr. Moore, from Minot, North Dakota, has bought a section of land near Fish Lake, Man., 18 miles west of Wawota, to be used as a fur-farming ranch, for foxes, mink, skunks, and raccoons, the breeding stock to come from the States.

Evidently Lost

Speaker (after forty minutes of the usual talk): And so at 20 I faced the world with 50 cents and a clear conscience.

Very bored voice from the rear row: "And what happened to the conscience?"

Keep Minard's in the Medicine chest.

Guarding Canada's Coastline

Eternal Vigilance Of Lighthouse Attendants Makes Water Commerce Possible

Except in fog or storm, Canada's rapidly growing water commerce seldom gives even a passing thought to the eternal vigilance of a silent service which makes that commerce possible, says the Boston Transcript. Only in time of trouble is attention paid to the 11,702 individual establishments of the lighthouse service guarding the 52,800 miles of Canada's coastline.

From Cape Race, at the extreme eastern point of this continent, to Queen Charlotte Islands, on the Pacific Ocean, over 200 persons are employed in guarding the paths of trade. The lighthouse service in 1,771 lighthouses, 200 fog signal stations, 543 gas and signal buoys, six submarine bells, twelve lightships, and 8,470 unlighted buoys, beacons and day marks.

Distribution of the various orders of lighthouses, according to regions, is as follows: New Brunswick and Bay of Fundy (both shores), 170; Prince Edward Island, Gulf of St. Lawrence and Strait of Belle Isle, 240; Nova Scotia, south and east coast and Cape Race, 186; Quebec, Lower St. Lawrence and Bay of Chaleur, 290; Montreal, 242; Prescott and upper St. Lawrence, eighty-six; Parry Sound and Lakes, 178; Kenora, nine; Manitoba, sixteen; Victoria, B.C., 146; and Prince Rupert, fifty-six.

Canada's War Legacy

Over 112 Millions Is Required For Interest On Debt

Canada's ordinary expenditures (excluding of course, her outlay upon capital account), exceed 355 million dollars per year. Of this great sum, nearly 163 million dollars is directly attributable to the Great War, although the war has now been over for more than a decade.

Interest on the war debt demands over 112 millions; war pensions, over 40 millions; soldiers' civil re-establishment, nearly 5 millions.

While expenditures attributable to the Great War mount up to almost 163 millions, the so-called war taxes raised less than 142 millions in the last fiscal year, the greater part of this being secured from the sales tax, stamp taxes and income tax.

War taxes constitute less than one-third of Canada's revenues. Customs and excise duties furnish the country with more than half her ordinary receipts.

Sores Heal Quickly.—Have you a persistent sore that refuses to heal? Then, try Dr. Thomas' Electric Oil in the dressing. It will stop sloughing, carry away the proud flesh, draw out the pus and produce a clean way for the new skin. It is a recognized healer among old and young of people can certify that it healed where properly applied.

Many Trails In Parks

Baufl, Jasper, Yoho, Kootenay, and Glacier National Parks, in the Canadian Rockies all have trails well-marked and very pleasant to travel, some of which extend for 300 miles.

"Skinny" Men! Gain Weight Quick

New IRONIZED YEAST adds pounds in few weeks. Results guaranteed—or pay nothing

Men and women everywhere write that Ironized Yeast added 5 to 15 pounds often in few short weeks. Restores out-muscles. Gives manly color and clear, rosy skin. Builds strength and energy. Makes real men out of "skinny" weaklings. They ask—how does Ironized Yeast work so fast? Ironized Yeast is two great tonics in one. Weight-building YEAST treated with two kinds of strengthening, blood-enriching IRON used for years by highest medical authorities. The Yeast is also treated with Violet Rays to increase its effectiveness.

Only when Yeast is Ironized is it most effective. Iron is needed to bring out the weight-building, strengthening values of Yeast.

Pleasant tablets No "yeasty" taste. No gas or bloating. Don't be "skinny" or weak any longer. Let Ironized Yeast give you a real man's arms and legs, and a clear, rosy complexion. Ask your druggist today for full size treatment. If not delighted with quick results, get your money back. If Ironized Yeast is not for you, send \$1.25 direct to Canadian Ironized Yeast Co., Ltd., Port Hope, Ont. Desk 426-315.

Canada Must Use Aircraft

Or Business Of Dominion Will Be Hampered Says General MacBrien

Major-Gen. J. H. MacBrien, of Montreal, spoke on aviation and its relation to commerce and war, at the opening meeting of the Advertising Association's twenty-sixth annual convention in Montreal recently.

General MacBrien declared that Canadian business would be hampered unless aircraft were fully utilized in the speeding up of communication. The highways of the air would girdle the world, he declared, and Canada must have her share. When telephone dispatching, modern air-mail and express delivery become more general, aviation would be the safest form of travelling, he said.

A Broad Hint

A party of English tourists were visiting Edinburgh, and were shown the city by an old Scotsman.

At the end of the day, when the people were leaving, the old man said: "Weel, I hope ye've enjoyed yerself; an' mind, if any o' ye has lost his purse, he never had it out 'o' my company."

Many people are almost crippled with corns. But it is needless suffering which can be speedily ended with Holloway's Corn Remover.

Spain's cure for auto speeding is a stone pile and a goodly supply of hummers. Three years is the average limit for exercise.

For sunburn—apply Minard's Liniment.

The woman leader that used to strive to win women's rights now strives to get women to use them.

UNSWEETENED

Work of Counterfeiters Is Now Engaging the Attention Of the League of Nations

It is not generally known that since the Armistice there has been a huge increase in the crime of counterfeiting, and amongst the lesser but practical endeavours which have engaged the attention of the League of Nations is an attempt to minimize this international evil.

The extent of the menace is indicated by the results of an enquiry taken in 43 countries which shows that in a three year period no less than \$5,000,000 in counterfeit currency was seized by the police authorities while it was estimated that at least twice that amount remained in circulation.

Since the war the multiplication of currencies and the vagaries of the exchanges has afforded wide scope to counterfeiters who availed themselves of the differences between the penal legislation of various countries and the lack of co-ordination between their police authorities to ply their trade and escape punishment.

This led the French government in 1927, to suggest that the matter should be taken up by the financial section of the League, and excellent progress has been made in curtailing the operations of the counterfeiters.

The convention on this subject which met recently at Geneva obliged the contracting parties to punish the counterfeiting of foreign currencies just as severely as the counterfeiting of their own and contains extradition clauses to make sure that offenders are brought to justice.

Canada in the past has suffered severely from the operations of the counterfeiter and will follow with close interest the findings of the police, legal and financial experts, who are dealing with the subject at Geneva.

Plague Killing Oak Trees

Famous Forest in England Is To Be Cut Down

Great Britain's largest oak forest, the Royal Forest of Dean, which was planted to provide timber for the British Navy, is being cut down. Unlike Sherwood Forest, which is gradually disappearing to make room for colliery developments, Dean is suffering from the ravages of disease.

Hundreds of acres of trees are being attacked by a mysterious ailment, and are going prematurely to decay. Their branches are shrivelling up and dying, and their trunks are becoming overgrown with moss and fungus. The forest, in some parts, is intact, but over a large area in the centre the decayed boughs and stunted trees make a pitiable picture. The giant of the forest is a giant no longer. Pithless disease has sapped its vitality.

The exact cause of the forest plague cannot be determined, although experts have made frequent investigations to discover it. The investigation, however, has ascertained that the chief cause of the rot is an unknown fungi entering the lower dead or dying branches of the trees. One theory is that harm is done by the frequent tunnelling and earth disturbance occasioned by the working of mines under the forest.

Egg Laying Contest

Barred Rocks lead for both total and weekly production in the Manitoba egg laying contest at the experimental farm, at Brandon. The pen owned by John G. Scott, of Minto, leads for total production with a record of 1,586.7 points and 1,436 eggs, and the pen owned by T. E. Holme, of Minto, is leading for weekly production with a score of 71.3 points and 63 eggs.

Mistress: And when you leave I shall want plenty of warning.

Servant: It's my habit, ma'am, merely to give a toast with my own horn.

ECONOMY.

"What are you skyring so many matches for, Kate?"
"I dropped a match under the sideboard."—Lustige Kölner Zeitung, Cologne.

Religion In Russia

Soviets Learning Nature Of People Cannot Be Changed By Law

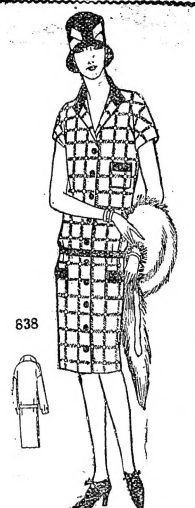

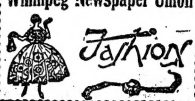

The Russian soviet government has abandoned so many of the things it stood for when it came into being that it would not be surprising to receive confirmation of the report that it is about to abandon its official opposition to all religion.

According to dispatches from Moscow, an amendment to the constitution is to be submitted removing restrictions on religious practices. The soviet is not to abandon passive objection to religion but it is to abandon its active efforts at suppression. It will declare separation of church and state, and schools and church, but it will grant its people the right to such religious practices as they care to adopt. In other words, it will cease to persecute its people on religious grounds.

The Russian people are essentially religious in their nature. They have an inborn faith, which though it has been rough ridden by their rulers, has not been eradicated. According to observers, it is simple but intense and deep rooted. Under the rule of the soviet, its outward manifestations have been disrupted, but the spirit among the masses has been undisturbed.

Slowly the soviet is learning that the nature of a whole people cannot be changed by law and edict. That which has been bred by centuries of habit and cultivation cannot be destroyed in an instant. A nation and its habits of thought and living are the product of long development. That which has been created through such a period is part of the foundation that reaches deep into the spirit.

Good Openings Here

For Danish Farmers

Great Opportunity For Workers Danish Advisor Tells C.N.R. Officers

"We are pleased to know that Danish settlers are so acceptable to Canada, and I can see that there is great opportunity for them in agriculture here, provided they are ready to work," stated Mr. Christensen, government adviser in agriculture for Western Jutland, Denmark, while on his way home after escorting a party of Danish settlers to Winnipeg, where they were located under the auspices of the Colonization Department of the Canadian National Railways.

While in Canada Mr. Christensen took the opportunity of studying the junior farmer movement, and the work of the boys' and girls' clubs, which has proved immensely successful in Canada in raising the quality of livestock produced on the farms.

"With the same amount of work he would have to put into an ordinary farm holding in Denmark, a Danish farmer should be able to be very prosperous on the wonderfully fertile Canadian soil," said Mr. Christensen, discussing with C.N.R. officials the matter of Danish settlement in Canada. "It takes a good deal of money to go into farming properly in our country. The cheap farm lands, and the possibility of operating a great deal more land to better advantage with the same effort, is a great attraction for our people to Canada. We do not know of any of our people to come here, however, who are not willing to go into farm work."

Mutual Encouragement

Men Always Work Better Under Influence Of Kindness

Men grow better and work better in good weather. Hard times and harsh discipline, whether of men or circumstances, may test and toughen endurance and siffer courage and fibre, but growth and usefulness flourish better in the warmth of good will and kindness. These are the spring tides of human life, which can awaken all its hidden power and riches. We grow better, work better, and are in all ways happier in the habit of mutual encouragement and the widespread warmth of genuine good will.—Philadelphia Ledger.

His Best Effort

A small boy was told that he must write to his grandmother a letter of sympathy on the death of her husband.

"This is the letter, adorned with many blue, that eventually arrived: 'Dear Grandmam—What a pity about poor Grandpa! Please send me some stamps. There is a new boy here who squeaks if I hit him.—With love, from Roger.'"

Traffic In Drugs

Narcotic drugs are constantly arriving in Toronto through the mails, according to Crown Attorney W. K. Murphy, who declared in police court that it was only necessary to telephone a certain number in Detroit to secure delivery by mail in a little red bag, of illicit dope.

RECENT PHOTO OF HIS MAJESTY

The most recent photograph of King George as he appeared just before leaving Bognor for Windsor Castle.

Best Recipe For Longevity

Building Up Bodily Resistance To Disease Says Famous Surgeon

Dr. William Mayo, world famous surgeon, who with his equally famous brother, Charles, gave \$2,000,000 to the University of Minnesota for medical research, says longevity is largely a matter of building up body resistance.

Three hundred years ago a man was old at 30, for the average span of life was 20 years. This has been extended until now it is fifty-eight. Today science is concentrating to increase the resistance powers of human beings and thereby combat dreaded diseases like cancer and tuberculosis. A life span of 100 is a possibility.

Discussing prohibition, Dr. Mayo believes that it will result in immense benefit to the human race.

"From the standpoint of public health, abstinence from liquor would prove beneficial," he said. He referred to Vienna, where "since the advent of pure water for drinking purposes consumption of liquor has dropped 40 per cent. in ten years. "Pure water always has and always will be the great beverage for human beings," says the surgeon.

Shortage Of Spoons

Doctor: "Give your husband five teaspoons of this mixture every evening before going to bed."

Wife of Patient: "I can't do that, doctor."

Doctor: "Nonsense."

Wife: "We have only three teaspoons."

"You wife's a blond, isn't she?"

"I'm not certain. She's at the beauty parlor this afternoon."

CANADIAN PACIFIC EXPRESS

Ancient Traveller

This strange-looking animal is a Duck-billed Platypus. It originated in Australia and is thought to be the only specimen of its kind in Canada. Its body is eighteen inches long and its head and feet, the latter being flat and webbed, greatly resemble those of a duck. It has the tail of a beaver. Canadian Pacific Express officials had no problem of feeding it as it has been stuffed for over a hundred years.

International Ice Patrols Searching For Icebergs In Broad Sweep of North Atlantic

New Canadians To the Fore

Difficulties Of Assimilation Of The Foreigners Seem To Be Exaggerated

The high schools of Calgary recently engaged in the preliminary oratorical contest. Of the five candidates in the city finals one was born in Canada, one in England, one in Lithuania, one in Roumania, and one in Russia.

Of those five, four were immigrants still young enough to be in high school, yet each born in a different country. All come together in competition to see which could best speak, in English be it realized, to an assembled audience. It is not improbable that they spoke upon some subject relating to the welfare of this land in which they now live.

We hear a great deal of the difficulties of assimilation. We produce our pessimists who spend their days and nights crying aloud against the bringing in of the foreigner. Too often we tend to overlook the other side, and forget that there are many influences incessantly at work tending to make Canadians of these newcomers. These five oratorical contestants will serve to remind us of that.—Willson's Monthly.

Buy Where You Sell

Merchants. As Well As Citizens Should Patronize Home Industries

"Buy at home—you live there," with variations such as "you work there" or "you make your money there"—has been a favorite advertising slogan with merchants for a great many years.

All of which makes me feel once again that a dose of one's own medicine should be prescribed occasionally.

In plainer words, a merchant whom we may call "Jones" is noted for his anxiety in relation to the home purchasing propensities of his townspeople, particularly when this applies to groceries—which Jones handles.

Jones, however, places his printing order with a cut-rate artist in a metropolitan center, and returns from a business trip to this same center each Fall, with two or three attractive sales made by the city tailor.

Now, Jones, that isn't nice. "Buy at home—you sell there," is a motto that you should hang upon your office wall—and read it carefully when next you feel the urge to preach to your neighbor.—Richard S. Bond.

Experiment With Fur Animals

Russian Sable and Stone Marten From Europe By Ontario Government

A pair of Russian sable and a pair of stone marten have been brought from Europe by the Ontario Department of Game and Fisheries, and placed on the provincial fur farm near Kirkfield, Ont. The animals were brought out to determine whether they can be raised in sufficient numbers in Ontario to benefit the fur trade. The animals were accompanied on the journey to Canada by 250 Hungarian partridges whose broods will be used for restocking purposes in suitable locations in the province.

Better Than Gossip

There are many worth-while things to talk about, if only we would turn our attention to them. Books, for instance. What fruitful time friends can have talking over the books that they have been reading! Music and art make good topics of conversation. If each of us would resolve to lift his talk a little, the level of gossip would rise and everybody would be better off.

Erecting Seed Cleaning Plant

The Dominion Government will erect and equip a modern seed cleaning plant at Moose Jaw, at a cost of \$150,000, and jointly finance with the Provincial Government up to \$150,000 per unit, the establishing of seed cleaning plants under the auspices of municipalities or agricultural societies.

Need Temperature Change

It is now held that chronic nervousness and its attendant ills occur where there is little change in the temperature conditions from season to season, and disappear when the patient migrates to higher elevations or where there is a well-defined range of weather conditions.

Hunting for icebergs has been a regular business on the Atlantic ocean for three months in the year since the spasm of horror passed through the world in April, 1912, when the news came that the gigantic liner "Titanic" had crashed into an iceberg and was lost, with most of her passengers and crew. It was this terrible catastrophe that gave birth to what is known as the International Ice Patrol, whose duty it is to protect all who cross the Atlantic from a similar calamity as far as possible.

Cost of this patrol is shared by several European nations, including England and France, with the United States; but the patrol itself is provided by the United States Coast Service, and its duty is to patrol the seas, from the Grand Banks to the Arctic, in search of floating icebergs and fields.

On the first day of April each year this ice-hunt begins, and continues night and day until the close of June—three months of strenuous, perilous and unceasing labor, such as no other seamen on the face of the waters know.

When with the coming spring, winter releases her grasp on the regions near the Pole, bergs, and even fields of ice break away from their "moorings" with the rise of temperature and are swept southward by currents from Labrador and Greenland, in many cases crossing the routes of trans-Atlantic traffic.

It was in latitude 41 degrees 46 minutes N. that the Titanic came to her tragic end; and enormous icebergs have been seen two degrees further south—considerably more than half the distance between the Pole and the Equator.

It requires little imagination to realize the menace of such colossal hotsms of the sea to vessels across whose path they are swept; for many of them weigh hundreds of thousands of tons though only one-eighth of their bulk is visible above the surface of the sea. No lights or siren notes reveal their presence. In the darkness of night scarcely even a spectral glimmer can be seen before the doomed ship crashes into them to her destruction.

Having encountered one of these floating ledges its exact position is marked on the chart, and a wireless message is sent out to shipping to give warning of its locality. The patrol ship then stands by the towering peak of ice, observing its speed, the direction of its travelling, its size, and so on—information which is also wireless—as a warning to ships likely to cross its path.

Some bergs will travel as much as 30 miles in 24 hours; others only cover five or six miles. A berg, leading due south, may be caught in a cross-current and swept east or west, or back to the north, and thus it is often necessary to keep it closely company for days until perhaps it is swept into apparent safety. Occasionally a landing is made on berg or field and a more detailed and accurate examination made of it than is possible from a ship.

Was Premier Of France

Ernest Monis, premier of France for four months, in 1911, died recently at the age of 82 years in straitened circumstances at his home, in Chateaufort-sur-Charente. M. Monis was a radical republican, moderately inclined towards socialism. He was a lawyer and was at one time vice-president of the French senate.

Dairying An Important Industry

Dairying is one of the oldest and one of the most important of the industries of Canada. It owes its modern development to the introduction of the factory system for the making of cheese and butter, to the invention of the centrifugal cream separator, and to the facilities afforded by improved methods of cold storage.

WORLD HAPPENINGS BRIEFLY TOLD

The question of the eligibility of women for appointment to the Senate of Canada is expected to be considered by the Judicial Committee of the Privy Council shortly.

The United States has communicated to the League of Nations its agreement with Canada concerning radio communication between private experimental stations.

Dr. Hugo Eckener, director of the Zeppelin Company, emphatically denied the trans-Atlantic dirigible Graf Zeppelin had been sold or that he was negotiating for its sale in the United States.

The treaty between Canada and the United States designed to conserve the sockeye salmon fisheries of the Fraser River, will not be ratified by the Canadian parliament this session.

Fatally struck by a wire cable which snapped under a heavy load, Mike Bizliczek is dead at The Pas. The cable being wound in the process of loading a gravel train panned Bizliczek's chest when it broke.

Sir Colville Barclay, British ambassador to Portugal, died in a London sanatorium following an operation. He was councillor to the embassy at Washington in 1912, and minister plenipotentiary to Washington in 1918. He was 60 years of age.

Twenty-five British boys coming out under the auspices of the department of agriculture of the Saskatchewan Government, were among the 174 passengers from the "Andania" who arrived in Winnipeg over Canadian National recently.

A slim line of railway steel from Cranberry Portage, jutting along toward Cold Lake, begins to stretch farther into the rich mining land of Manitoba's north. Work has just begun on the Cold Lake branch, but the line is expected to be operating by September.

IS THERE A BABY IN YOUR HOME?

Is there a baby or young children in your home? If there is you should not be without a box of Baby's Own Tablets. Childhood ailments come quickly and means should always be at hand to promptly fight them. Baby's Own Tablets are the ideal home remedy. They regulate the bowels; sweeten the stomach; banish constipation and indigestion; break up colds and simple fevers—in fact they relieve all the minor ills of little ones. Concerning them Mrs. Moise Cabot, of Montreal, writes: "Baby's Own Tablets are the best remedy in the world for little ones. My baby suffered terribly from indigestion and vomiting, but the Tablets soon set her right and now she is in perfect health." The Tablets are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Bread 76 Years Old

A small loaf of bread, said to have been baked Good Friday, March 22, 1853, is on exhibition here. It is owned by Mrs. Bee Hough Bartlett, 89, and was baked by her mother, Mrs. Bartlett. She says a legend that a loaf baked on Good Friday will endure forever prompted its making and its preservation for 76 years.

A safe and sure medicine for a child troubled with worms is Mother Graves' Worm Exterminator.

Two convicts were talking. "You know," said one, "it took John Bunyan all his life to write a story."

"Garn," was the reply, "it took me ten years to do a sentence."

On Your Holidays

Be sure to take Minard's along. It will come in useful for any of dozens of emergencies.

A Strange People

Russian Exploration Party Makes Interesting Discovery In Siberia

Discovery of a strange race of people who make a habit of smoking from the cradle to the grave, and who live on a steady diet of animal fat during the winter to keep themselves warm is reported by a Russian exploration party.

Known as the Udeke tribe, these people inhabit the vast virgin woodlands of coastal Siberia. They live in crude dwellings built of branches of trees and bark, and they use leaves and skins as covering.

According to the Russian explorers the total number of the tribe is not more than 1,300. As they have no means of recording events, the history of their origin cannot be learned, but it is presumed that they were driven out of Manchuria and Mongolia several hundred years ago.

Although secluded, they are not shut off entirely from the rest of the world. Russians, Burjats and Korean farmers live in the lower valleys of the rivers in which they fish, and contact with these neighbors is indicated by the finding of firearms among the Mongol tribe.

Recipes For This Week

(By Betty Barclay)

HONEY CORN FLAKE MUFFINS

1½ cups corn flakes.
1½ cups Graham flour.
2 cups white flour.
1 tablespoon shortening.
2 cups milk.
¼ cup honey.

5 teaspoonful baking powder.
Mix melted shortening with honey, add to one egg beaten lightly, then add milk. Stir in the dry ingredients which have been thoroughly mixed. Bake in well-greased muffin tins for thirty minutes. (Will make 32 muffins.)

SIRLOIN STEAK JULIENNE

Cut sirloin steak that is about three-quarters inch thick in three-inch squares. Roll in flour, brown both sides lightly in frying pan. Place browned squares in baking dish, sprinkle with salt and pepper lightly. Cover with tomato puree and for each piece of sirloin steak allow one teaspoonful of honey. After covering with tomato puree, add the honey. Then place a layer of onion and celery strips over the entire top, cover pan and bake slowly for four hours. Uncover, and bake for about fifteen minutes in good hot oven to properly brown steak. At least four or five strips each of onion and celery should be allowed for each serving.

Fort McMurray Salt Fields

Sir Thomas Tait of the Canadian Salt Company has just completed an examination of the salt fields at Fort McMurray with a view to exploitation.

Winnipeg is the home of upwards of 800 diversified industries which produce over \$152,000,000 worth of goods annually.

"Your wife is talking of going to France this summer. Have you any objections?"

"No, certainly not. Let her talk."

Germany took only a few hours to invade, but is taking many years in evading.

I'm never too tired to sleep now~

Rested nerves make all the difference. Your doctor will tell you how chewing relieves nervous tension, how the healthful cleansing action of Wrigley's refreshes the mouth and tones you up.

Keep Your Baby Well and Strong

A baby's health and development depend largely upon the care and food it receives. Your infant should be bathed daily and fed regularly. If you cannot nurse your baby try Eagle Brand Milk.

The foremost infant food—made from rich cow's milk and granulated sugar—especially for babies. Recommended by physicians everywhere on account of its quality and uniformity.

In this paper from time to time you will find an advertisement of Eagle Brand Milk, a food that has raised more healthy babies than all the prepared infant foods combined. Cut out the advertisement and mail it to The Borden Company, Limited, 140 St. Paul St. West, Montreal and they will send you, free of charge, a very helpful baby welfare book containing authoritative feeding directions and a vast amount of useful information on the care of baby. Also ask for Baby Record, a diary of baby's progress.

Northern Wireless Station

Report Shows Cost Of Installation and Maintenance Of Eight Stations Serving Northland

A report concerning the eight wireless stations in Alberta and in the far north, operated by the Department of National Defence—at Akivik, Herschel Islands, Dawson, Mayo, Port Simpson, Port Smith, Port Resolute and Edmonton—show the cost of construction of the eight stations to have been \$156,330, and that of annual operation \$98,258.

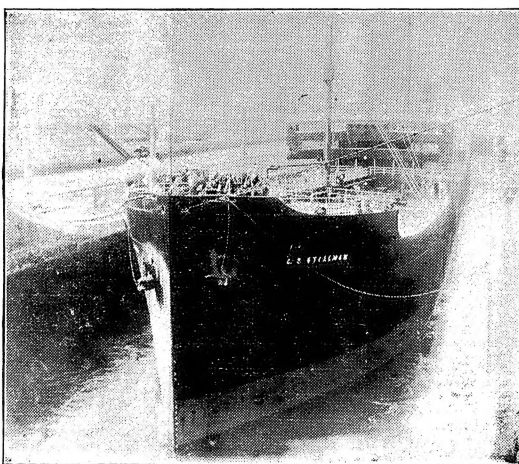

For Sprains and Bruises.—There is nothing better for sprains and contusions than Dr. Thomas' Electric Oil. It will reduce the swelling that follows a sprain, will cool the inflamed flesh and draw the pain. It will take the ache out of a bruise by counteracting the inflammation. A trial will convince any who doubt its power.

Southern Alberta Honey

Two and a quarter tons of apiary frames were delivered to the Riedel Honey Company plant at Taber, Alberta, the other day, shipped by the Alberta Pox Company plant at Calgary. The company is preparing for a record season's production.

We are using and destroying our forests four and one-half times faster than we are replenishing them.

IN THE PANAMA CANAL

The world's largest tank ship, the "C. O. Sillman" passing through the locks near Colon. The Sillman is named after Mr. C. O. Sillman, of Toronto, President of Imperial Oil Limited, her owners.

Rush For Land Still Growing

Homesteading In Northern Alberta This Year Has Been Unprecedented

The land rush to Northern Alberta continues apace. It is reported by the Edmonton offices of the Canadian National Railways Colonization Department that approximately 1,000 new settlers with capital aggregating more than one million dollars, had gone into the Peace River country and Northern Alberta since the first of the year and up to the first week of April. It is estimated that during April alone nearly 1,500 settlers will settle in these districts. During the period of April 1st to 15th, a total of 312 settlers with capital totalling \$170,000 went to the Peace River District. Among these was one man with \$30,000 capital, another with \$14,000 and another with \$12,000.

During the first quarter of the year 400,000 acres of government land were taken up by homesteaders in the four western provinces, an increase of nearly 100,000 acres over the same period of last year. In the period mentioned, 156 homesteads were taken in Manitoba, 994 in Saskatchewan, 1,277 in Alberta, and 96 in British Columbia. Homesteading in Northern Alberta has been unprecedented during this period.

Every month so far this year has seen homestead entries at the Edmonton office double over the corresponding months last year. For March alone the total was 226, as compared with 109 in March, 1928.

Last year there were 3,370 homesteads filed on in the Edmonton district, an increase of 147 per cent. over the previous year. There is every reason to believe that the increase noted so far this year will not only be kept up, but may even exceed that of 1928, over 1927. Even if the figures only double, it will mean that close to 7,000 homesteads will be taken up in this district alone.

Signaller Deserted Post

Member Of Scots Guards Has Been Discharged From Army

George Silverwright, the Scots Guards signaller who shattered all British military traditions by deserting his post in front of Buckingham Palace not long ago, will not be a heroic figure for tourists and nursemaids' eyes any more.

He was found guilty by a court-martial and was sentenced to 112 days' hard labour in a civil prison and to be discharged from the army with ignominy.

Silverwright had pleaded that he was sleeping.

Cause Of The Noise

"What was all that noise o'ah at yoh house last night?" asked one colored woman of another, "Sounding like a lot of catamounts down broke loose."

"Dat? Why dat was nothin' only yer german' from de furniture stoh collectin' his easy payments."

No Rest With Asthma. Asthma usually attacks at night, the one time when rest is needed most. Hence the loss of strength, the nervous debility, the loss of flesh and other evils which must be expected unless relief is secured. Fortunately relief is possible. Dr. J. D. Kellogg's Asthma Remedy has proved its merits through years of service. A trial will surely convince you.

Professor's Wife.—The war started the 1st of August, 1914, didn't it? Prof. (absent-mindedly)—No, my dear, we were really married in 1912.

SUNDAY SCHOOL LESSON

JUNE 16

JUDAH TAKEN CAPTIVE

Golden Text: "Righteousness exalteth a nation; but sin is a reproach to any people."—Proverbs 14:34.
Lesson: 2 Kings 25:1-21.
Devotional Reading: Psalm 107, 10-16.

Explanations and Comments

The Siege Of Jerusalem, verses 1-3.—In the ninth year of Zedekiah's reign, 586 B.C. in the tenth month according to the Babylonian calendar, which numbered its months from the spring season, the tenth month corresponding to our January, and on the tenth day of the month, Nebuchadnezzar, King of Babylon, came with his army and besieged Jerusalem. "The nation never forgot the month, and the day on which the armies of Chaldean finally invested the city. It was felt as the day of the deepest gloom by the Israelite exiles, Ezek. 24. It has been commemorated as a fast, the Fast of Tebeth, ever since in the Jewish Church."—Dean Stanley.

Nebuchadnezzar's army encamped around the city and built forts against it. The forts were probably movable towers from which missiles could be discharged over the city walls. Jerusalem held out for eighteen months. From Jeremiah 34, 7, we learn that a part of Nebuchadnezzar's troops were engaged in attacking Lachish and Azekah during this time, and from Jeremiah 37:5, 11, that the reported approach of an army from Egypt caused a brief raising of the siege. The siege was resumed, and at last famine became so acute in the city that there was no bread for the people. Read the account in Jeremiah 21:7-9; Lamentations 4:8-10; 5:10.

The Fate Of Jerusalem, verses 8-10, 13-17.—On the seventh day of the fifth month, Nebuzaradan, the captain of Nebuchadnezzar's guard (literally, "chief of the executioners," the king's bodyguard to whom such duties belonged), came to complete the destruction of Jerusalem. The work of devastation was thoroughly done. The gold and silver vessels, and the pillars and vessels of brass of the temple were saved to be carried to Babylon, and then the sacred temple, on which such a passion of love had been lavished, was razed to the ground. The king's palace and every great house in the city was burned, and the city walls were broken down.

UNUSUAL APRON

An unusual apron, cleverly designed, that appears more like a pretty morning frock, is found in Pattern No. 345. It has a comfortable fitting waist, which is cut in one with front panel. The side sections are gathered and don't slash ties at back. See small view! Japanese pongee silk, cotton crepes in floral design, Zephyr prints or plain figured sateen will give unending service for general wear, and will launder beautifully. Designed in small, medium and large size. The medium size requires 2½ yards of 40-inch material with ½ yard of 18-inch contrasting. Price 25 cents in stamps or coin (coin preferred).

Felt Tired and Miserable

"I took Lydia E. Pinkham's Vegetable Compound for miserable and tired feelings and it gave me strength to do my work. My nerves are better and I feel well and strong and have a good appetite. I sleep well and am in pretty good spirits and able to work every day now. I recommend the Vegetable Compound and you may use this letter as a testimonial."—Miss Delena Wallace, Union Street, North Devon, New Brunswick.

Canadian Chorists

Make Splendid Showing In Competition Held In New York

Americans are accustomed to Canada winning high honours at international stock and grain shows, but a surprise was sprung when two Canadian male choirs went to New York and captured second and third places in competition with the best male choirs of the United States. These were the Ottawa Temple Choir, and the Peterboro (Ontario), Male Chorus, awarded two of the first three places in the "B" Class of the international choral contest. First prize went to the Baltimore and Ohio Railroad Glee Club of Baltimore, with 88½ points out of a possible 100, the Ottawa Temple Choir was next with 87½ points, and the Peterboro Male Chorus third with 86½ points. The contest was one of the features of a two-day choral festival held under the auspices of the Associated Glee Clubs of America, in which 76 choirs from the United States and Canada took part, totalling 4,000 voices. In the contest in which the two Canadian choirs scored second and third places, 14 choirs were entered.

Canadian Fish For Britain

Large Supplies Of Fresh Fish To Be Shipped In Fast Refrigerator Steamers

Major Hugh A. Green, former director of fish supplies for the Canadian Expeditionary Forces, is in Ottawa from England conferring with the Government in regard to the purchase by a British firm, of which the Major is now managing director, of large supplies of fresh fish—at least 1,000 tons weekly—which will be conveyed to the British Isles by fast, refrigerator steamers plying between the Maritimes and Great Britain.

Government To Treat Sands Announcement is made that the Dominion Government will build a \$30,000 plant at Edmonton for the extraction of bitumen from tar sands. These sands are contained in vast deposits in the Athabasca district.

Brandon Aero Club The recently formed Brandon Aero Club is applying for a charter to deal in all forms of aeronautics and public airport operations.

Nervous and Run Down The Least Noise Would Bother Her

Mrs. R. Burton, Oshawa, Ont., writes:—"Three years ago I was so nervous and run down I could hardly bear to have the children make a noise. It would bother me so."

"A friend advised me to take

and after taking two boxes I began to feel stronger, looked better and the color came back into my cheeks, and now I am feeling fine again."
Price 50c, a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

NEED FOR MORE RESEARCH WORK IS STRESSED

Halifax.—"Don't be content with second rate work, nor expect tremendous results in a year, but be confident in the future of scientific research in Canada. If you do this, you have nothing to fear for the future of the Dominion in industry or nationhood," said Dr. H. M. Tory, president of the National Research Council, speaking before the Canadian Manufacturers Association at the work of the council in its investigations into Canadian resources.

Outlining the unprecedented development of research into the scientific phases of industry in Britain, the United States, Japan and Italy, since the war, Dr. Tory told the manufacturers the time had come for Canada to take her place with the other nations of the world in the setting up of laboratories and the special training of scientists to man them. "But it will be money wasted," he said, "unless the manufacturers of Canada are alive to their opportunities and employ them. The idea is rapidly passing that we must take our ideas from other peoples. Too many of our brilliant men are engaged in building up the industrial life of foreign lands."

Speaking of the work that had already been done by the Institute of Canada, Dr. Tory instanced the magnetic industry, which in three years of research, had been placed in a position amply able to compete in the world market. During the past year 105 investigations had been carried on in the development of new resources and this work would be greatly extended in the new building, with the addition of students now being trained.

Discuss Tariff Question

Canadian Manufacturers Association To Make Pronouncement

Halifax, N.S.—"The manufacturer who takes one view on protection for what he produces and another on what he buys not only is inconsistent but he undermines the very position he seeks to safeguard," was the opinion of President L.W. Simms at a session of the Canadian Manufacturers Association, at which the report of the tariff committee was adopted with a motion that a committee be appointed by the president to draw up a pronouncement on tariff matters.

Canada's tariff problem was different from that of any other country, said H. M. Tory, president. On one hand were the agriculturists entitled to special consideration in their marketing activities. Industrial development was essential. Any tariff policy must be shaped toward the goal of cheaper production and requests to the tariff committee should always be qualified to that end.

Cannot Return To Germany

Former Kaiser Is Barred From Fatherland For A Further Period

Berlin, Germany.—Former Kaiser Wilhelm's hope to return to Germany to spend his last days was postponed again when the Federal Council voted 62 to 4 in favor of a government bill lengthening by three years the law for the protection of the republic, which would have expired soon.

The law permits the government to keep the former Kaiser out of Germany as a menace to the Republic. It was passed by the Reichstag in the summer of 1922 as an emergency measure, after the assassination of Walter Rathenau.

His Majesty's Condition Is Improving

Bulletins Issued By Physicians Show Satisfactory Progress

Windsor, England.—King George suffered no ill effects from the excitement of receiving the outgoing and incoming Prime Ministers on successive days.

Three physicians visited the monarch recently and issued a bulletin showing satisfactory progress. Complete recovery probably will be slow, but all keen anxiety has passed from the royal household.

C.N.R. Earnings

Montreal.—The Canadian National Railway gross earnings for the ten day period ending May 31, 1929, were \$7,549,000, as compared with \$7,545,000 for the corresponding period of 1928.

W. N. U. 1789

Flames Creates Havoc In Northern Mining Town

Cranberry Portage Suffers Heavy Loss Through Fire

The Pax, Man.—Surrounded by a wall of fire, forest rangers, railway construction workers, miners and every available able bodied man in Cranberry Portage, little Manitoba mining town, on the shores of picturesque Lake Athabapapaskow, battled to save what remained of the settlement after the flames had brought destruction the day before. It was the townsite of Cranberry Portage, constructed only a few months ago, across the railway tracks from what is now known as the Old Town, that was destroyed when flames from a forest fire swept in from the north.

Within 20 minutes, a score of dwellings, several business buildings, the railway station, and hospital, were smouldering ruins, and 200 persons out of the town's 800 population had been rendered homeless. There were no casualties. The property loss will run into thousands of dollars and many small personal fortunes were swept away. No insurance was carried, as Cranberry was considered a fire hazard by the underwriting companies, surrounded as it is by forest.

Ramsay MacDonald To Lead

Accepts King's Invitation To Form A Cabinet

London, England.—Right Hon. Ramsay MacDonald, leader of the Labor party, accepted the King's invitation to form a Cabinet to replace that of Right Hon. Stanley Baldwin, Conservative Premier, who resigned. Official announcement of the acceptance was made at Windsor Castle, where the King was ill, a few minutes after the Labor leader had called and left to go back to London.

He arrived at 11:04 a.m. with his son Alastair MacDonald and Lord Arnold.

The King's equerry, Colonel Seymour, escorted him inside the castle. He remained slightly more than an hour, leaving at 12:15.

It was the second cabinet Mr. MacDonald has been called upon to form. The first was that of more than five years ago when the Labor party, with the help of the Liberals, was given its first chance at the control of the British government.

Forest Fires In Japan

Damage To Property Already Over Three Million

Tokio.—Heavy rains over the island of Saghalien and Yokoaido have greatly lessened the threat from forest fires there, although resumption is feared when the weather dries. Fire fighters are redoubling their efforts hoping to end the menace while the rain continues.

The governor-general of Saghalien reported losses on his island included 41 dead, 163 seriously injured, and 1,206 houses destroyed, 4,710 homeless, and about \$3,250,000 damage to urban property. Damage to the forests had not been estimated.

Appreciate Their Leader

Ottawa.—Paying tribute to the party leadership of Hon. R. B. Bennett in parliament this session, Conservative members and senators united in a dinner tendered to him. Expressions of loyalty and appreciation for Mr. Bennett's leadership were voiced.

Passes Railway Bill

Ottawa.—The Senate committee on railways recommended without amendment the bill authorizing the Canadian National Railways to construct terminal facilities in Montreal at an estimated cost of \$51,400,000.

Fear Break Between China and Russia

Trouble Arising Over Arrest Of Soviet Officials In Manchuria

London, England.—Russian troops were said by a Peking dispatch to the Express, to be massing on the Manchurian frontier to prevent thousands of Chinese from leaving Russian territory. The flight of the Chinese was in fear of arrest and deprivation of their belongings in retaliation for the arrest of Soviet officials in Manchuria.

Rengo news agency of Japan reported that Soviet consul general Kuznetsov, of Mukden, was under arrest at Haier and that intense anxiety was felt in the Harbin Soviet community where a complete break between Russia and China was feared.

The strained relations between the two countries began with Chinese raids on Soviet consulates in search of documents to support charges that Communists were actively interfering in Chinese internal affairs. The raids were followed by a sharp note of protest by the Soviet virtually suspending diplomatic immunity of Chinese officials in its territory.

REVISION OF GRAIN ACT IS RECOMMENDED

Ottawa.—Complete revision and consolidation of the Canada Grain Act at the next session of Parliament is recommended in an unanimous report tabled in the House of Commons by the Parliamentary Committee of Agriculture.

The chief recommendations contained in the report are the following:

Amendments to the Canada Grain Act to prohibit mixing in the four statutory grades of red spring wheat, namely: No. 1 hard, No. 1 Northern, No. 2 and No. 3.

This amendment would not become effective until August 1, 1930.

The output standard for all terminal elevators of all statutory and commercial grades of red spring wheat be a composite sample equal to 75 per cent. of the average quality of the grade and 50 per cent. of the minimum quality of such grade at the primary inspection points. This provision would be made effective on August 1, of this year, and would apply to the current year's crop.

The board of grain commissioners to be composed of three members as at present. In addition to these there will be four assistant commissioners, who are to be located, one in each prairie province, and one at the head of the lakes. The commission itself would be given power to name its own headquarters.

Certain increased powers to be given to the board to assess loss and damage in any case where a complaint is made, with power to enforce its findings in any court of competent jurisdiction. Appeal from such may be allowed in the district or county court in which the person entering such complaint resides.

The recommendation is made that the standards board be constituted on a different basis from that now prevailing. The producers would have one-half of the representation on the board, which would be comprised of the following:

The Board of Grain Commissioners, the chairman of the Board of Grain Appeal, the chief inspector, the chief chemist, the Dominion cerealist, one representative of the millers, four representatives of producers from Alberta, five from Saskatchewan, three from Manitoba, and one from British Columbia.

WINS ORATORICAL CONTEST

Roche Pinard, 18, of Montreal, whose eloquent speech of "Canada Among the Nations" won him the Canadian Oratorical contest at Toronto on May 22. Pinard will represent Canada at the international contest in Washington.

Saskatchewan Leads In Scout Training

Had More Leadership Courses Last Year Than All Other Provinces Combined

Regina.—Saskatchewan was able to report more training courses for scout leadership than all the other provinces combined during the year ending May 31, 1929. It was stated by W. J. P. Solby, provincial secretary of the Boy Scouts Association. More than 525 adults took the indoor Gilwell training courses, 409 of these being granted certificates from Dominion headquarters.

The figures were disclosed at the annual meeting of the Canadian General Council of the Association at Ottawa, which reported an increase of 86 troops and 273 leaders in the Dominion during the year. There are now 53,000 scouts and leaders in Canada.

As an indication of the constant progress of the organization, it was stated that 34,170 scout rank and proficiency badges had been awarded in 1928-29, an increase of 5,626 over the preceding year. The report of the welfare work of the association showed that, through 93 centres, toys had been distributed to more than 50,000 children last Christmas, including 5,000 children of newly-arrived immigrants.

Going To South America

Tide Of Immigration Now Running In Southwesterly Direction

Rio De Janeiro, Brazil.—The tide of emigration, which for decades flowed westward across the Atlantic to New York and other American ports has definitely set in a southwesterly direction.

European steamship companies are operating larger and faster steamers to South America, than were the pre-war emigrant carriers of the North Atlantic, with much better accommodation. Under these conditions Brazilians believe that their country is on the verge of a great increase in population with consequent agricultural development.

Japanese Ship Afire

London, England.—A message to Lloyds from Yokohama said the Japanese steamer "Ugo Maru" was reported a total loss from fire with the crew and passengers believed drowned. The fire began May 31. Other Japanese dispatches said the ship was afire with 700 Russian passengers, 380 of them women, and 43 Japanese crew members.

Mount Vesuvius In Eruption

Heavy Fall Of Smoke And Ashes Hangs Over Naples

Naples.—Huge clouds of smoke, laden with ashes, from the belching throat of Mount Vesuvius, hung over Naples and turned the brightness of noon into a kind of twilight.

Napoliitans were unable to see their familiar land mark which was clouded by the screen of smoke issuing from its crater.

The Associated Press correspondent visited Terzigno and found conditions terrible. Families were withdrawing with all their belongings and cattle. They flocked into the churches on the line of retreat, invoking Saint Gennaro and praying before shrines.

Troops took possession of villages to prevent marauding after the inhabitants had departed.

ESTIMATES FOR DEFENCE MEET WITH OPPOSITION

Ottawa.—Canada had denounced war as a national policy and for this reason it was inconsistent that the estimates in the department of national defence should show an increase, declared Miss Agnes MacPhail, Progressive member for South East Grey, in the House of Commons.

Miss MacPhail was emphatic in opposition to the national defence estimates and during the consideration of cadet services moved an amendment to reduce the amount of the appropriation from \$500,000 to \$1. The amendment was defeated 66 to 15.

The only woman member of parliament declared she would like to see Canadians take the stand that war should be forever abandoned.

J. S. Woodsword, Labor, Winnipeg North Centre, complained that the supplementary estimates would bring the total for the department to more than \$21,000,000. While it was true that only a few reckless adventurers or ruthless profiteers would deliberately attempt to foster another war, a conflict was quite possible so long as conditions remained as they were. The pile up debts of the last war constituted all the materials Canada needed.

Mr. Woodsword declared that as the militia estimates amounted to \$20,000,000 he did not think it would be too much to ask that \$200,000 be spent on peace.

The money could establish a chair or international relations in every university in Canada. It could provide for the sending of three or four Canadian students from each university into foreign countries to study foreign affairs. It could provide for the training of young men desirous of entering the ambassadorial service. If we were to have peace we must make preparations for it and be willing to spend something on peace.

Col. A. L. Ralston, minister of defence, said it was not correct to say that Canada spending \$20,000,000 or proposed to spend it under the estimates, on her militia. As a matter of fact the vote this year for military services was \$11,065,000 whereas in 1913-14 when more value could be secured for one's money the vote for military services was about quarter of a million dollars higher. Canada was in a happy position geographically and at no time did the United States enter as a factor in the country's defence budget.

Canada had only one regular soldier to every 3,000 individuals. The permanent force was not even a decent police force. The real defence force of the country was the non-permanent active militia.

Canada was not given credit for the length to which the country had gone in disarmament. No nation spent less on warlike activities. Brigadier General J. A. Clark, Conservative, Vancouver-Burrard, asked if it were not possible that instead of using a large civilian staff for the administration of the department, clerks could not be recruited from among the members of the permanent force. G. G. Coote, U.F.A., Macleod, asked for the total number of cadets in Canada. There were 133,403. Col. Ralston said. A large portion of the grant for cadet service was expended to provide physical training for boys schools throughout Canada.

Wrong Man Convicted

London, England.—After serving three months in prison, Ernest Lee 25, received a pardon and \$500. It was found after he had served this time on a charge of posting as a brewer's agent, and collecting a commission, that another man was guilty. The guilty party, already in jail on another crime, confessed.

WILL APPOINT TWO MORE TRADE AGENTS TO U. S.

Ottawa.—Trade and commerce estimates "buy from the countries which buy from us." That was the slogan which Conservative members of the House of Commons urged when estimates of the department of trade and commerce were under review. The debate covered a very wide field. It took in the new United States tariff, the opportunities of trade with the countries of South America and methods of advertising Canada abroad.

The comparative advantages of a foreign trade and a domestic trade brought on a discussion which eventually ended in an argument on the tariff. However, the estimates piloted by Hon. James Macdonald, minister of trade and commerce, seemed fairly satisfactory to all parties and moved through with reasonable facility.

The announcement by the minister that two new trade commissioners were being located in the United States brought the first opposition. Conservative speakers insisted that if the new tariff act of the United States became law, Canadian trade commissioners could bring more results almost anywhere else than stationed in that fruitful field for trade expansion.

"During the past five years," said Hon. R. E. Bennett, Conservative leader, "we have every evidence that when Canadian manufactured goods have found a market in the United States, that market has been closed to them by the United States tariff, either by changing the classification or by a presidential proclamation under their elastic tariff provisions. That their elastic tariff provisions." That was the intention of the tariff act of the United States. It was put there for that purpose. Therefore let us devote our time and energy to other markets."

He endorsed a preceding speech by Alfred Speakman (U.F.A., Red Deer), that greater efforts be made in South America. The people of South America would, other things being equal, rather trade with Canada than perhaps any other country. Mr. Bennett also urged that more time and effort should be expended to cultivate home markets and part of the trade with Canadian consumers which annually makes necessary the importation of \$1,390,000,000 worth of foreign goods.

The United States, he said, was not going to allow Canada to invade its markets. Canada should keep her own markets free from foreign competition.

Western Canada Air Mail

Negotiations With Various Airway Companies Still Proceeding

Ottawa, Ont.—Negotiations between the post office department and the various airway companies of Western Canada in regard to the forwarding of a contract for the carrying of mail from Winnipeg west to Calgary and Edmonton and intermediate cities are still proceeding, but it is considered most improbable here that action will be taken until after the close of Parliament.

Officials of the department said recently that the problem presented by the desire of several airlines to share in the contract appeared no nearer a solution than several weeks ago.

Receives Appointment

Dr. Alty, Of Saskatchewan University, Accepts Post In England

Saskatoon.—Dr. Thomas Alty, professor of physics at the University of Saskatchewan for the past four years, will leave for England at the end of June. He has received the appointment of senior physicist to the Imperial Chemical Industries.

This organization, which is under the presidency of Lord Melchett, is an amalgamation of the chemical industries of Great Britain. They have recently built a large research laboratory in Cheshire, where they will carry on research in pure and applied science. Dr. Alty will be in charge of the physics research.

To Be Presented At Court

London, England.—Thirteen Canadian women are to be presented at Court, June 26. Those to be presented by Mrs. P. C. Larkins, wife of the Hon. P. C. Larkins, Canadian High Commissioner in London, include Mrs. J. H. Woods, Calgary, wife of the managing director of the Calgary Herald.

Ceremonial planting at La Paz, Peru, in which the whole community joins in prayer for a bountiful harvest. The photograph is of a painting by J. E. Sampson, U.S.A., a Canadian artist.

SURVIVAL OF AN ANCIENT INCA CUSTOM

Canada Has Doll Industry

Toronto Firm Makes Them Better and Cheaper Than Germany

Dolls manufactured in Toronto have cut out German dolls in the South African, New Zealand and Australian markets, according to G. F. Stevens, Canadian trade commissioner to South Africa.

In a recent interview, Mr. Stevens said the greatest surprise he got during his several years' regime as Canadian trade commissioner to South Africa, was that a Canadian firm was able to produce better and cheaper dolls than the Germans and undersell them in the South African market.

The history of this enterprise is most interesting. In 1921 two Toronto brothers started in one room at 591 Queen St. W. Their present warehouse, which they have occupied for two years, comprises over ten thousand square feet of floor space. Last year their business increased 50 per cent.

Recently the buyer of a large Toronto firm ordered a sample doll. He took the sample to Germany and asked a firm to duplicate it in quality and price. They were unable to do so. Today the Toronto firm has 200 different types of dolls on the market and they are almost unable to keep up with the demand.

"How did you learn the doll-making business?" one of the partners of the firm was asked. "I taught myself," said one of the brothers. "It seems that we both had a natural bent for the business. We design all our own dolls and have instituted all kinds of new features that the Germans cannot duplicate."

In a visit to the factory boxes filled with legs, arms, heads, bodies, dresses, shoes and all the requisites of doll-making were seen. In the shipping department were cases full of dolls awaiting transportation to Cape Town, Auckland and Sydney.

Hog Rations

Fishmeal As a Substitute For Skim Milk In Hog Raising

While it is recognized that dairying and hog raising go well together, one need not be discouraged in undertaking to raise pigs in the absence of a by-product of dairying. Fishmeal, a commercial product of considerable importance, is proving a useful substitute to skim milk as a supplement to the grain ration during the fattening period. At a trial carried out at the Agassiz, British Columbia, experimental farm, during sixty-four days, the two feeds were compared. Two pens were fed a ration consisting of one part bran, one part corn meal, two parts shorts, and seven per cent. fish meal. Two other pens were fed a similar basic grain ration except that no fishmeal was included. The hogs were given instead of the fishmeal six pounds of skim milk per pig per day. The milk was charged at 25 cents per hundred pounds, and the fishmeal at 550 cents per ton. While the skim milk, feed groups produced slightly cheaper gains, the rate of gain was practically the same for the two lots. In his report for last year, published by the Department of Agriculture, at Ottawa, the superintendent of the farm, concluded that the results secured from this experiment and previous ones show that skim milk at 25 cents per hundred pounds gives a cheaper pork than fishmeal at 876 to 889 a ton. The difference in the cost in this test amounted to about two cents a pound of gain made by the hogs.

The Music Of The Bagpipes

Question Is Asked Is It Music Or Just Regulated Noise

Opinions may differ among the Sassenachs as to whether the strains of the bagpipes should be designated as music or just regulated noise, but the members of the Toronto Gaelic Society have no doubt as to their music as to the correct appellation. It is just exasperating when people say they don't like the pipes, a speaker at a meeting of this society stated the other evening. But the Gales should make some allowance for those whose ears have been untuned to the sound of the pibroch, and in whose veins there flows none of the blood of an ancestor who was "in the pipe." Most people are agreed that a piping for the national music of the "Highlands" is born with a person and cannot be acquired. It is begotten of instinct, not of training. To a Gael, six pipers in a drawing room playing "Monymusk" is the approach to celestial art ever attained by man, but the non-Gael have other opinions on the subject. The latter are to be pitied, no doubt, but surely not condemned. It is just their misfortune, not their fault. Toronto Globe.

Making Things New

To make things new is not the same as to make new things. To make new things is the work of the hand; to make things new is the work of the heart, all things are made new. They are made so without changing a line, without altering a feature. Pithrone in your heart an object of love, and you have renewed the universe. You have given an added note to every bird, a fresh joy to every brook, a fairer tint to every flower. George Matheson.

Sky Is The Limit

A valuable addition to any property you may own is the air above it. Legally, you have a right to sell or lease the air, although some lawyers contend that the air is like navigable water and may not be interfered with.

It is getting the kite on a string that makes it soar.

Thousand Accidents Due To Carelessness

Forty Per Cent. Caused By Negligence Of Drivers At Protected Railway Crossings

In nearly one thousand accident cases reported to the Board of Railway Commissioners during the past year, there was danger of loss of life or damage to property because of negligence at highway-railway crossings, according to a bulletin received by the Canadian National Railway. Of these accidents 369 were reported on the lines of the Canadian National System. Under the various classifications of negligence more than 40 per cent. of the accidents occurred where crossing gates are operated. There were 325 cases where vehicles broke or damaged crossing gates which had been lowered; 25 where drivers ignored signals and drove through gates; 35 cases of driving under gates which were being raised or lowered; seven cases of driving on to crossings after opposite gate had been lowered, five where drivers under the influence of liquor crashed into the gates, and three accidents due to pedestrians climbing over or under gates.

Under the heading "Inexplicable Negligence" the Board lists 105 cases, in which 44 drove into the side of moving trains; 38 drove into the side of standing trains, and one drove between the railway cars during switching. Twelve persons stopped or parked too close to railway tracks, and seven drove their automobiles along the railway tracks, while one driver went to sleep in his automobile after parking directly on the railway lines, and another stopped his car in the middle of the crossing while he walked back to find something which he had dropped, and the driver of a wagon stopped on the railway tracks to adjust his load. Ineffective brakes were responsible for eleven accidents so reported, and the balance of the list were under the heading of "Not Classified."

Operating department officials of the Canadian National System point to the stress under which such negligence by automobile drivers and others places locomotive engineers who have to be constantly on the alert to avoid injuring or killing such people for whom every possible safeguard is provided, though they will not avail themselves of the protection offered, and also point out that large numbers of locomotive engineers suffer nervous breakdowns during their service because of the excessive load on their endurance by the carelessness of people using the high ways.

The Music Of The Bagpipes

Question Is Asked Is It Music Or Just Regulated Noise

Opinions may differ among the Sassenachs as to whether the strains of the bagpipes should be designated as music or just regulated noise, but the members of the Toronto Gaelic Society have no doubt as to their music as to the correct appellation. It is just exasperating when people say they don't like the pipes, a speaker at a meeting of this society stated the other evening. But the Gales should make some allowance for those whose ears have been untuned to the sound of the pibroch, and in whose veins there flows none of the blood of an ancestor who was "in the pipe." Most people are agreed that a piping for the national music of the "Highlands" is born with a person and cannot be acquired. It is begotten of instinct, not of training. To a Gael, six pipers in a drawing room playing "Monymusk" is the approach to celestial art ever attained by man, but the non-Gael have other opinions on the subject. The latter are to be pitied, no doubt, but surely not condemned. It is just their misfortune, not their fault. Toronto Globe.

Making Things New

To make things new is not the same as to make new things. To make new things is the work of the hand; to make things new is the work of the heart, all things are made new. They are made so without changing a line, without altering a feature. Pithrone in your heart an object of love, and you have renewed the universe. It is getting the kite on a string that makes it soar.

H. L. TAYLOR,

newly appointed purchasing agent for the Canadian National Railway at Vancouver, who will have charge of all purchases throughout British Columbia. Mr. Taylor has been associated with the Canadian National Railway and its component companies since 1906, when he joined the staff of the Canadian Northern in Winnipeg. He succeeds C. C. Labrie, resigned.

Cherry Growing In Manitoba

Breeding Of New Varieties Is Producing Good Results

Cherries of fair size and fair quality are produced in the province of Manitoba. At the Morden Station, the federal experimental farms system, the breeding of new varieties by crossing and the growing of hardy varieties brought from cold countries is producing hopeful results. Losses from injury by winter killing and freezing back of named varieties at the Morden station is leading to more and more dependence on seedlings from hardy European varieties. Fair crops of fruit were harvested last year from seedlings of the varieties Shubrinka, and Vladimir, which are proving harder than named varieties grown at the station. According to W. R. Leslie, superintendent of the station, in his report published by the Department of Agriculture, at Ottawa, the fruit from some of the trees while sour was of fair quality. The best results were obtained from trees on their own roots being sufficiently hardy to withstand the cold of winter even in seasons of light snow fall.

Poultry Pool

The Poultry Pool has formed a new organization under the name of the Canadian Poultry Pool Limited which will be the selling agency for the individual pools of the four western provinces, with head office at Winnipeg, and with A. W. Lindroth as president and superintendent.

Got It Anyway

"Smith is unlucky he put his whole fortune into his wife's name so that his creditors would not get it."

"He did right."

"But his wife has eloped with his chief creditor."

"Do you play golf?"

"No; I was born a liar."

Protecting Calves Against Blackleg

Disease Is Preventable By the Use Of Vaccines

In certain sections of the country, particularly where the drainage is poor, cattle owners suffer losses through the disease of blackleg which attacks calves after they are six months of age and up to the time that they are two years old. It seldom attacks cattle of other ages and rarely affects other classes of live stock. Dr. A. E. Cameron, chief veterinary inspector of the Department of Agriculture, at Ottawa, describes the disease, which is marked by loss of appetite, dullness and high temperature. Swelling of the body above the legs at any point is a common symptom and is accompanied by a crackling sound when pressed with the hand. The crackling, Dr. Cameron explains, is due to the formation of gas in pockets in the tissues beneath the skin. Fortunately the disease is preventable by vaccination with blackleg Aggressus Filtrates of Vaccines products obtainable through local agencies, druggists and veterinarians. In Bulletin No. 117, of the Department of Agriculture, instructions are contained for submitting specimens to the laboratory of the department for examination. A few drops of blood of an animal that is suspected of having the disease, in an equal amount of glycerine, may be placed in a phial. If a phial is not convenient, a few drops of the blood if dropped on a sheet of clean note paper and allowed to dry, will answer as a specimen. In either case the package must be carefully packed with the sender's name and address and the history of the case and carefully wrapped according to instructions contained in the bulletin, which is obtainable from the Publications Branch of the Department. Dr. Cameron recommends as a preventive measure the inoculation of young calves before they go to pasture, and in badly infected districts, inoculation again in the fall is recommended.

Shared Honors With Foch

Humble Funeral Sought By Troops Waiting For Great Soldier

A British spectator of Marshal Foch's funeral procession tells of a beautiful incident unrecorded by the newspapers.

The streets were empty, and two lines of soldiers were drawn up on each side, waiting for the great soldier to pass by for the last time. Presently there appeared from a side street a small and very humble hearse followed by five or six poor people on foot. It passed down the Rue de Rivoli, and from his balcony the spectator saw how at every point the troops gave the military salute.

Application Is Delayed

The hearing of the application from poultry producers of the western provinces before the tariff advisory board, asking for an increase in the duty on all foreign shell eggs, which do not comply with the specifications of Canadian extras, will not be heard until September, according to intimations which have reached Ottawa.

Adopting New Method To Fight Tuberculosis

Science Is Mobilizing Its Forces In Effort To Conquer "White Plague"

Some of the accomplishments of the first great mobilization of science in a fight against tuberculosis under the National Tuberculosis Association are revealed by Dr. Kendall Emerson, managing director of the association.

These results, he says, may have a revolutionary effect upon the methods of attacking disease germs. Seventeen American institutions have pooled their research brains and facilities in a national drive to eradicate tuberculosis. Through development of a synthetic fluid in which microbes flourish, a technique has been evolved for discovering by chemical analysis all the substances of which germs are made - their proteins, fats and sugars and how these are built.

The aim is to isolate the specific poison and then to find an antidote. Whatever is accomplished is expected to throw a new light on the other germ diseases that still are uncontrollable.

This period research is sponsored by the National Tuberculosis Association through a special committee on research.

A harmless bacillus which lives on Timothy Hay and is named the Timothy Bacillus, has become an important factor in this fight. The Timothy organism has been adopted by the scientists as the laboratory "control." A control in laboratory parlance is a subject so similar to the one under test that it may be used for comparison with the human tubercle bacillus. The Timothy germ will produce disease in no known animal. Its value is the guidance it may afford in the search for the all-important factor that is lacking in it but present in the disease-producing germ.

Other germs, all harmful, belonging to the same family as the Timothy Bacillus are those that cause leprosy, and bone and bird tuberculosis.

Whaling In North Pacific

Whaling Steamers Leave For Summer Work In Northern Waters

The whaling steamers are off for the west coast again for their summer catch of the big ocean mammals. They will be gone until early in the fall, the practice being for the little vessels to make their summer base at stations located in the Queen Charlotte Islands, whence they make their excursions to the open sea.

While in most parts of the world, whales are reported to be vanishing, the last few years have given little evidence of this tendency on the north Pacific and the annual catches appear to be fairly consistent, the average being about 300 annually.

The whale is no longer killed for its oil alone, although that is still an important article of commerce. A wide variety of products are now fashioned from the bone and carcass of the whale, such as "regret" and "sappy" plumes which, as they were originally known are no longer legally available owing to the scarcity of the birds that bore the feathers. The whale generously comes forward with a substitute manufactured from certain parts of his bony structure. Sueted whale tails are a delicacy in the far east and whale meat is growing in popularity in the southern states and in Europe. Whale bone is still used in the making of corsets and hand-fired brushes. The bone also provides a substitute for ivory. Another valuable by-product of the whale is the blood and crushed bone and dried flesh which is used extensively as fertilizer.

Egg Tariff Correction

The egg producers of the western provinces are not asking for any increase in the duties on frozen eggs. In the report of the hearing of their application before the tariff advisory board, May 15, it was erroneously stated that the increase asked for applied to all eggs which did not conform with the Canadian extra specifications. It should have said all shell eggs. The increase asked is from three cents to nine cents.

No Spring There

Landlady: "Good morning. Mr. Flumps. Did you sleep well?"

New Boarder: "Only so-so. I'm afraid I'm not used to a three-season bed."

Landlady: "Three season?"

New Boarder: "Yes, one with no spring in it!"

"I've forgotten half of all I learned in college."

"Which was it, the fraternity grip or the varsity yell?"

Does Mixed Farming Pay?

Farmers In Cardston District Apparently Think It Does

The Cardston (Alberta) correspondent of the Lethbridge Herald writes: Here is what the Cardston district farmers know about mixed farming: \$700 a week from cream checks right now, at a time when it used to be that everybody's cows had dried up; \$1,000 a week from milk (and recently it was \$10,000), hogs alone, and this has been steady now for some six weeks; and over \$15,000 in new money from sale of horses, which does not include many other horses sold in trade for tractors. This "horse" money is like finding it, too, for they have been mostly mere "grass eaters."

That mixed farming is working a miracle here can be readily seen when one comments about the snow-storms and late spring. "Doesn't it make grass?" and "Who is worrying?" or "I should worry!" or the usual remark, "Late! Yes, but why plant so much wheat anyway, and sell it, then have to buy chicken feed and hog feed at elevator prices?" The negotiations now under way to place 400 milk cows on the U.I.D. is going to give a wonderful impetus to the creamery business, and thousands of dollars of "cream checks" will be written in this country in a few years where hundreds are now written. Increased milk production will increase the hog production, and other by-products, particularly poultry.

In fact, the vision now seen of the Cardston district is more rosy than for many years past. The individual holdings may be smaller and the gross returns less per farmer than in the big "wheat" areas, but these returns are growing to be sure and regular, and "store bills" are going to disappear, and machinery bills, and big land payments, etc. At least, that is how many farmers picture it today.

Strawberries For Canning

Tests Made For Suitability For Canning Of Different Varieties

This strawberry holds an important place in the desert fruits enjoyed by the people of Manitoba. The home garden crops on many farms provide fresh strawberries during the ripening season as well as large quantities for canning purposes. Tests for suitability for canning of different varieties grown at the Morden Experimental Station were made by the university graduates in Home Economics, M. W. R. Leslie, the superintendent of the station, in his report for last year, gives the results of the tests on the basis of colour of the fruit when canned. The varieties turning out very rich, red fruit are given as Marvel, Premier, Prince, Easy Picker, and a few others, including Clampton. For good colour Dunlap, Dr. Burritt, and Progressive stand high. Of the medium pink to light red colour, Glen Mary, Minnesota, Nokomis, and Mastodon are classed. Of the lighter, more coloured varieties Stevens Late, Rockwood Giant, Cooper, and a few others are named. The report of the station for last year, published by the Department of Agriculture, at Ottawa, gives the other qualifications of these varieties including softness, productivity, and shape. The report is based on a four-year period with fruit grown at the station and canned under definite controlled conditions. Mr. Leslie observes that fully red berries are desired in order to obtain the best bright colour in the canned product.

Bicycle Gaining In Popularity

It is evident from an official report recently issued that the bicycle is gaining in popularity in Canada. In 1928 the production of bicycles in Canada reached a new high record with the selling value of products 52 per cent. higher than in 1927. Last year 27,999 "wheels," as bicycles are popularly termed, were sold by Canadian manufacturers valued at \$890,480.

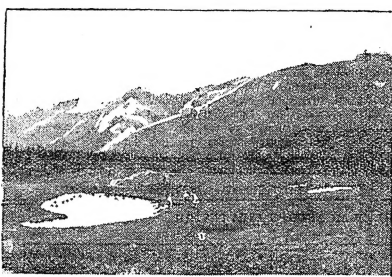

Lady: Walter, you have let a hair fall in my soup.

Bald-Headed Guy: You flatterer.

"Think what a misfortune it will be for you if you die."

"Console yourself. I will arrange not to die if it will trouble you." — Buen Humor, Madrid.

A HARD PAR FIVE

No. 2, Old Man - 450 yards, Par 5.

No. 2, Old Man - 450 Yards, Par 5.

The slope of the ground, the bunkers and traps, as well as the length, make this one of the many difficult holes on the Jasper Park Lodge Course, Jasper National Park, Alberta, over which the Canadian and Western Canada Amateur Championships will be played, August 19-24, this summer.

Par for the entire course is 72, and the nearest to any amateur has come to date is 74. Compared with some other holes this one is easy and that means a lot of reputations may be wrecked this summer, not a few of them right here.

"Did you might shave your face is all stubble."

"But we have lived on herring for a week and the beard is pushing through." Lantige Sachre, Leipzig.

The Desert Song

—BY—
VIRGINIA MORRIS
Copyright 1929 Warner Bros. Pictures, Inc.
"The Desert Song" is a Warner Bros. production of this novel, it is based upon the story by Otto Harbach, Laurence Schwab, Oscar Blumenthal, 2nd, and Frank Mandel.

Margot Bonvalet was alone. It was late afternoon and she had just given Paul Fontaine her answer. General Birabeau would marry them that night. She was allowing herself a few last moments of meditation. Lending against a tremendous mosaic archway, she stood on the balcony and gazed at the vast desert. It awoke in her heart an infinite longing, the ache for an indescribable something that would never be fulfilled. This was not the wedding day of which she dreamed.

Her reverie was broken as a man's figure vaulted the railing behind her. She gave a startled cry, for the stranger was clad in a burmose of flaming scarlet and his face was hidden behind a protecting mask.

"Oh, you're the Red Shadow!" she managed to exclaim when she had recovered her breath and had steadied herself against a chair.

He bowed gallantly. "A votre service, Mademoiselle."

Margot assumed a dignity that she did not feel. "Hush! There you come here!" she demanded.

"I heard you call for romance," her visitor explained. "I, too, long for romance and I would dare anything to get what I want. But what would you dare, that's what I came to find out."

The girl ignored the question which the Red Shadow had asked with gusto.

"Do you realize that one scream from me would wake up the Red Shadow?" she asked him.

The mysterious stranger shrugged his shoulders. "You wouldn't call for romance in one breath and toss it away in the next."

The ardor of his voice grew as he leaned toward her. "Will you come with me?" he begged. "If you come, I promise not to hold you, but you will stay."

Margot had been clutching her riding crop to give her confidence. Now she raised it quickly. With it she struck the man before her straight across his face. He buried his head in his arm to alleviate the pain and reeled against the balcony rail.

But the girl's indignation quickly cooled. She was alarmed at what she had done. "Oh, oh, I've blinded you!" she cried, running over to him. But the Red Shadow had by now recovered himself.

"No, Margot, you haven't blinded me, you've just opened my eyes. Now I'm going to make you love me!"

Before she could protest she felt his arms around her, felt him crush her body against his own, felt his mouth seek hers. For a wonderful moment she yielded. But the remembrance of her promise to Paul restrained her to her senses and she drew herself away from him.

"General Birabeau! Paul! Paul! Come quickly."

With a nimble leap, the Red Shadow scaled the balcony once more and, blowing her a kiss, was gone.

A moment later she was surrounded by the officers of the garrison. In breathless sentences she told them of the outlaw's visit, of his presumptuous advances. General Birabeau was inclined not to believe her. He thought that the episode was an invention of the girl's feverish imaginings, inspired perhaps by her successive disappointments in Paul.

She found a sympathetic listener when Pierre came in a little later.

"What did he look like?" he asked.

"He was all dressed in red, Pierre. His complexion is no darker than yours. He was masked, but his eyes seemed to gleam through. He's a big man—about a head taller than you—and, oh, how strong he is!"

At this juncture, Captain Fontaine, who had heard the report of the Red Shadow's visit, came hurriedly in. He could not understand how the leader of the Rifles had gained access to the house, for every entrance and exit was carefully guarded by troops. However, he considered the man's effrontery in coming a personal challenge to him and determined to run him down that night. Already the signal fires were blazing on the darkening horizon. The Rifles were calling their leader and he would answer them as always.

While her fiancé prepared to leave, Margot was both disappointed and relieved. After all, he was as she had known him to be, her lover only when the bugle did not summon him to military adventure. With the menace of the Red Shadow now uppermost in his mind, romance was again forgotten. He would lead a cavalry troop into the desert at once to kill the Red Shadow, for he realized that the natives loved this man and might revolt if he were taken prisoner.

Alone again, Margot waited—she knew not for what. A sudden volley of shots in the courtyard told her that the Rifles and the French were in active combat. The outlaws had dared now to attack the garrison itself. She felt the tiny revolver in her pocket and was about to seek an even surer safety when

the Red Shadow entered the room once more as mysteriously as before. She whipped out the gun and levelled it at him.

"Come a step nearer and I'll fire!" For a moment he said nothing but only looked at her very steadily. When he noticed that she wavered, he whispered softly, "Put down that gun!"

Quickly she raised it to take aim, but more quickly still he caught her wrist and turned it until the weapon fell to the floor. And before she could make further protest he had picked her up in his arms. In vain she fought to free herself. In vain she called for help. There was none to aid her, for every soldier in the garrison was fighting grimly to keep off the attacking Rifles.

Outside, his white horse waited for him. In an instant he had thrown the girl across the saddle and had mounted. The pony galloped wildly forward, far, far across the sand into the mystery of the desert night, into the vast unknown where romance and love are found. Margot Bonvalet no longer struggled. She clung to the rider, who held her close while he spurred his horse on to a greater speed, and the world she had known was left far behind.

CHAPTER V.

The Red Shadow did not take his beautiful homelike to the Rifles' encampment in the hills. Instead, he turned his horse's head to the distant oasis in the midst of which towered the magnificent palace of Ali Ben Ali. Riding close at his heels came twenty of his own men who carried off Benne and Susan as their prisoners. Their leader lifted Margot from his saddle and gave her in to the care of his soldiers while he went to greet his host.

Ali Ben Ali received him in a great hall sumptuous with oriental luxury. His highly polished floor was inlaid with rare mosaics. Low divans covered with priceless rugs invited one to voluptuous ease. Within close reach of them were great brass bowls heaped high with luscious fruit. Or if one preferred smoking in the fashion of the east, there were low tables holding porcelain hookahs, the bubble pipes from which heavy oriental tobacco is inhaled through water.

The great Sheikh who had been amusing himself with some dancing girls from Spain, dismissed them when his guest approached. He stretched out his arms, saying "Hail, friend!"

The Red Shadow reciprocated this gesture of goodwill.

"Once more, Ali, I beg your kindness and shelter."

"Should not I protect the protector of my race? What is it this time? Have you burned down a prison or kidnapped a tax collector?"

"This time it's a little different!" admitted his visitor with a smile.

"Ah, yes, to be sure, you bring two women captives—that is unusual. Many times I have offered you the hospitality of my Harem but you have always been as shy about women as—as a Christian."

From the Garden, Sid El Car entered with soldiers guiding Margot and Susan. Both of them were blindfolded but the Red Shadow immediately ordered the bandages removed from their eyes.

"Where's my Bennie?" demanded Susan, querulously.

Margot, still tugging at the ropes that bound her hands, cried "Where's that brute—that outlaw—that kidnapper?"

The Red Shadow bowed very low before her. Sheikh Ali Ben Ali ventured a suggestion of hospitality. But he addressed himself to the leader of the Rifles, "I presume you want them to get the same treatment as my women here—you want them bathed?"

The Red Shadow nodded. "By all means!"

"How dare you?" protested Margot. "As a French citizen, in the name of the republic of France, I demand to be released!"

Firmly but quietly, two slaves led the women away. Susan relished the adventure as much as Margot shrank from it. Some Rifles had brought in the captured journalist, Bennie Kia, who was already rousing his secretary's jealousy by his not too furtive glances at the seductive Spaniards.

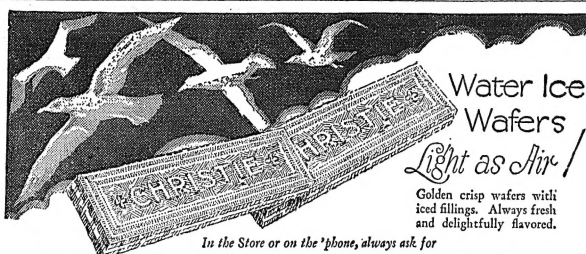

"Oh, Bennie!" squealed Susan, "he's taking me upstairs. But somehow, Bennie made no movement of protest."

(To Be Continued.)

Brats the Sun

The 2,000,000 candle-power "Lindbergh Light" which Elmer Sperry is giving Chicago and the Midwest as a beacon for aviators will cast a light beam more powerful than the sun, a tenth more powerful in fact and it will reach 500 miles.

Farming Near the Equator

Girl In South Africa Turns Forest Into Farm Land
A land girl of Kenya Colony, Africa, is turning a forest into a dairy farm.

In addition to looking after her employer's cows, Miss Peggy Billson, a member of the Women's Farm and Garden Association, is hard at work clearing 367 acres of forest land, 8,000 feet high, at Molo, near the Equator, with the help of only half a dozen boys.

She writes that it is a slow job, as there is no dormant season and weeds grow all the time, but she has now cleared, stumped, fenced, and planted about six acres with oats. Since the war land women have had wonderful success as trained milkers, dairymaids, and stockwomen, and the demand for them steadily continues.

Large Numbers Of Repatriates Return

1,500 Canadians Returning To Canada From United States

During 1929, about two thousand French-Canadians will be repatriated from the New England States to take up farming in Quebec, Ontario and the far west of Canada, according to estimates of the Colonization Department of the Canadian National Railways. In 1928, through movements in which the Canadian National was directly interested, 1,600 Canadians, most of them natives of Quebec, returned to Canada to go on the land.

The royal road to success would have more travellers if so many weren't lost attempting to find short cuts.

Little Helps For This Week

"The Lord preserveth the faithful."—Psalm xxxi. 23.

Master, to do great work for Thee my hand is far too weak! Thou givest what may suit. Some little chips to cut with care minute.

Or thin, or grave, or polish. Others stand Before their quarried marble fair and grand, And make a life work of the great design.

Which Thou hast traced; or many, skilled, combine To build vast temples, gloriously planned; Yet take the tiny stones which I have wrought, Just one by one as they were given by Thee.

Not knowing what came next in Thy wise thought; Set each stone by Thy master-hand of grace, From the mosaic as Thou wilt for me, And in Thy temple pavement give it a place.

—Francis Ridley Havergal.

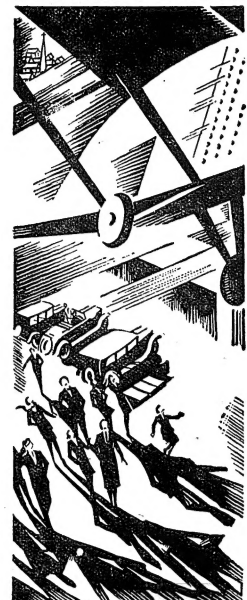

Fidelity in trifles, and an earnest seeking to please God in little matters, is a test of real devotion and love. Let your aim be to please our dear Lord perfectly in little things, and to attain a spirit of childlike simplicity and dependence.

—Jean Nicolas Grou.

River Runs Up Hill

A curious investigator reports that he has discovered a number of unique things in Pomerania. One of them is a river that occasionally runs up hill. The Oder has a fall of not quite 20 inches in the last 34 miles of its course, or only six-tenths of an inch a mile. When a strong north wind blows the current is reversed.

SKYWAYS AND HIGHWAYS

In the sky and on the highways, transportation moves at a faster tempo. The speed records of yesterday are commonplace today.

Greater speed is made possible by better and faster motors which call for a new margin of lubricating safety. Oils that were "good enough" ten years ago won't do today. Marvelube, a pure, carbon-free, full-bodied oil made from Peruvian Crude, is the preference of

Canadian aircraft operators and motorists.

Over half a million motorists in Canada have proved Marvelube's superior qualities. 90 out of every 100 miles flown by aircraft in Canada are travelled with Imperial Products.

There is a grade of Marvelube refined to meet exactly the specifications of your car, truck or tractor. Consult the Marvelube Chart at Imperial stations and dealers.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and burnings about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention. One spoonful of Phillips' Milk of Magnesia neutralizes instantly many

times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

Alberta Institute of Co-operation

Lethbridge Olds Vermilion

June 24-29, 1929

Arrangements have been completed for the holding of three separate Institutes of Co-operation in the Province, similar to the one which proved so successful at Edmonton last year.

The meetings will be addressed by speakers who are outstanding authorities on various phases of co-operation in many parts of the continent, and special attention will be paid to the problems in co-operation affecting Alberta farmers. The co-operative marketing of wheat, livestock, dairy products, and poultry and eggs, and the consumers' co-operative movement will be considered and discussed.

Special arrangements are being made for the junior section of the Institutes, and for the instruction and entertainment of the young people who will attend.

Plan to attend the Institute nearest your home, and in order to ensure accommodation, communicate at an early date with the registrar—

M. L. FRENG, F. S. GRIDALE, W. J. ELLIOTT,

Fortnightly Crop Report

Issued by Department of Agriculture Edmonton, June 8th, 1929

Crop conditions throughout the greater part of the province are very satisfactory and grain is making splendid growth according to telegraphic reports received by the Department of Agriculture on Friday for the third fortnightly report of the season. Moisture requirements for some weeks have been supplied by the heavy rains which visited the southern section of the province over last weekend, and all crops are growing rapidly.

Prospects in the Peace River district are very promising and any immediate danger of drouth has been removed by frequent rains during the past three weeks. Crops growing on land newly broken last season are looking exceptionally well.

In the Edmonton district and for some distance south and east the continued absence of precipitation is beginning to cause some concern, although in very few localities has the drouth as yet seriously reduced the prospects of a crop. In some limited areas high winds have caused damage from soil drifting, but this is by no means general. Breaking of new land has been retarded to some extent in this section of the province by the absence of moisture in the soil, while in the south a larger acreage than usual is being broken in readiness for next season's crop.

Early sown wheat in most localities is now covering the ground, and an exceptionally good stand of fall wheat is reported from many districts in the south. Alfalfa and sweet clover are making a vigorous growth, and prospects of an increased tonnage of sugar beets are excellent. Livestock generally is in good condition, and in a number of districts increased numbers of farmers are making a start with a small flock of sheep.

New Wool Growers Association Formed.

The Eastern Alberta Wool Growers Association has been formed with headquarters at Hanna and a membership comprising about 100 sheep owners in the district between Drumheller and Oyen. It is estimated that some 11,000 fleeces will be shipped through the association this year, the majority of the clip being marketed through the Canadian Co-operative Wool Growers. Dr. W. G. Anderson of Wardlaw is the president of the newly formed organization.

Regulations For Visiting Motrists

After July 1st any automobile being driven in Alberta with foreign license plates must carry on its windshield a sticker showing that the car bears a non-resident permit to be operated in this province. These permits which may be secured from provincial police officers, parks officials and others who come in contact with the travelling public, will provide a definite record of the number of cars visiting the province each year and the points of origin. The permit when issued is good for three months from date of issue and must be applied for within seven days of entrance into the province.

Sheep Poisoned by Death Camas

Following reports received from the Jenner and Atlee districts in south-eastern Alberta, Dr. P. R. Talbot, provincial veterinarian, recently visited these localities and found that the death of a number of sheep had been caused by their eating a weed known as Death Camas. This weed which grows

commonly in a number of districts in the south has been more prevalent than usual this season owing to climatic conditions. Its effects appear to be more serious when sheep are hot and hungry. The death camas belongs to the lily family, grows on sandy soil and is usually found on the slopes of hills facing south, and sheep eating it show the following symptoms: Frothing at the mouth, twitching of the muscles and convulsions followed by death. Shepherds are advised to keep their flocks away from areas where this plant has been discovered.

A very satisfactory antidote in cases of poisoning from this weed consists of one dram each of potassium permanganate and aluminum sulphate dissolved in a pint of water, this quantity being sufficient for about twelve sheep.

FARM FOR SALE

The Soldier Settlement Board of Canada offers for sale by public tender the west half of Section Twenty-eight (28), in Township Twenty-nine (29), Range Five (5), West of the Fourth Meridian, as described and subject to the exceptions and reservations contained in the existing Certificate of Title.

Terms of sale are not less than 20 per cent. of the purchase price in cash on acceptance of the tender, and the balance in 10 equal annual instalments with interest at 6 per cent. per annum on the amortization plan.

Each tender must be accompanied by an accepted cheque of \$100. If tender is accepted, this sum will be credited to the purchase price of the land. If tender is not accepted the money will be returned to the tenderer.

Tenders will be opened at Calgary, Alberta, on Wednesday, June 19th, 1929. The highest or any tender not necessarily accepted. If the land is not sold on the date above mentioned, the Board will be prepared to receive offers to purchase until such time as it is finally disposed of.

Tenders should be in plain envelopes marked "Tender for the purchase of the W. 1/2-28-29-5-W. 4th Meridian."

Address tenders and enquiries to THE SOLDIER SETTLEMENT BOARD OF CANADA, South Building, Calgary, Alberta.

Notice of Sale

Notice is hereby given under Section 48 of the Domestic Animals Act (Municipalities) that one bay gelding, brand appears to be diamond circle with bars to right on left shoulder, was impounded in the pound by John Pockens located on the S.E. 1/4 Sec. 20, Tp. 26, Rg. 8, W. 4th Mer., on the 2nd day of May, 1929, and that the said animal was sold on the 13th day of May, 1929, to Thos. Armstrong of Chinook, and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in the Alberta Gazette upon payment of all fees and costs due to the municipality and the purchase of said animal. For information apply to the undersigned.
